Sommario/riassunto

The importance of this book lies in its unique treatment of the economics of the developing countries. Emphasis is placed on the theoretical foundation of new theories and empirical models of development. A number of new topics are added in regard to the migration of labor force due to globalization, the relationship between private and public sectors, problems of regulations of the private sectors, problems of labor management in the era of globalization and transfer of organizational systems by the multinational companies from one country to another across cultural boundaries. Along with the
