of information, is substantially revised, and is updated to reflect current scholarship and practice. Focusing on child abuse and maltreatment, intimate partner violence (IPV), and older adult abuse, the book covers assessment procedures and evidence-based treatments used by social workers with victims and perpetrators of all age groups and of both genders. It provides expanded information on agencies advocating on behalf of children including child advocacy centers, guardians ad litem, and court-appointed special advocates as well as child welfare laws and policies. The textbook provides updated information related to IPV and vulnerable/at-risk populations including sex trafficking victims, veterans, and male victims. The second edition also features more in-depth theoretical information integrated with case studies, and new information regarding technological issues and criminal justice reform. The authors address assessments and interventions for adult victims of family violence, adult survivors of child abuse, child witnesses of domestic violence, adolescent victims of dating violence, older adult victims of abuse, and both male and female perpetrators of abuse. The text encompasses several features that make it particularly useful in the classroom, including real-life case studies in every chapter, key terms, and discussion questions.
