| Sommario/riassunto | This is the first comprehensive survey in English of research methods in the field of religious studies. It is designed to enable non-specialists |

and students at upper undergraduate and graduate levels to understand the variety of research methods used in the field. The aim is to create awareness of the relevant methods currently available and to stimulate an active interest in exploring unfamiliar methods, encouraging their use in research and enabling students and scholars to evaluate academic work with reference to methodological issues. A distinguished team of contributors cover a broad
