Conclusion and implications for the future; Notes; Bibliography 4. The rise of the East: what does it mean for development studies?

## Sommario/riassunto

<P>The West and the East approach economic development differently. The Europeans and Americans stress free and fair business climate, promoting private activities generally without picking winners, and improving governance. East Asia is interested in achieving concrete results and projects rather than formal correctness, prioritizing a few sectors for industrialization, and eventual graduation from aid. The West mostly shapes shifting strategies of the international donor community while the East has in reality made remarkable progress in industrial catch-up. The two approaches cannot be merg
