Waldman, and Kelley L. Sharp ; Perinatal palliative care in the context of fetal or neonatal surgery / David A. Munson ; Palliative care at the time of unexpected premature delivery / Lezlie H. Andersen, Bethany D. Kaemingk, and Christopher A. Collura ; Compassionate extubation and withdrawal of life-sustaining therapies / Jennifer S. Linebarger and Meghan Tracewski -- Supporting families and care providers through the nuances of palliative care. Lactation and breastfeeding in the context of perinatal palliative care / Diane L. Spatz and Joanna C. M. Cole ; Ten ethical principles for neonatal palliative care / Franco A. Carnevale, Jacqueline van Wijlen, and Brian S. Carter ; Spirituality: the effects of another's pain and suffering on care providers / Darryl I. Owens and Hadley Kifner ; Assessing perinatal grief intensity in the palliative care setting / Marianne H. Hutti and Lela A. Baker ; Strategies to honor professional well-being in perinatal and neonatal care / Kathie Kobler.

Sommario/riassunto

"The first resource of its kind, this authoritative handbook holistically addresses the multidimensional aspects of perinatal and neonatal palliative care. Written by an interprofessional team of renowned specialists, it is both a text and an evidence based reference for all members of the palliative care team. This book helps individual team members forge interdisciplinary approaches to care, assess current programs, improve the quality of care, and tailor new models of care. Encompassing the perspectives of numerous multidisciplinary healthcare providers, the book underscores the unique aspects of perinatal and neonatal palliative care, with a focus on improving quality of life, as well as comfort at the end of life. It describes healthcare for neonates and pregnant mothers, care and support of the family, planning and decision-making, and effective support for grief and bereavement, addressing all palliative and neonatal care settings. Other chapters focus on the prenatal period after diagnosis of the expected baby's life-threatening condition. These include such topics as care of the mother, delivering devastating news, and advance care planning. Each chapter contains photos, figures, and/or tables and case studies with clinical implications and critical thinking questions. Also included is an extensive listing of relevant palliative care organizations. Paintings and poetry provide an artistic backdrop to the authors' inspiring words."
