Sommario/riassunto

The projects in the Future Megacities programme gain valuable experiences in developing energy efficient standards and urban structures with adequate conditions to treat resources with care and avoid unnecessary emissions. To achieve the ambitious objectives, it is essential to convince and enable people to take an active part in sustainable development. This requires qualification and education efforts at different levels, with different target groups and for different topics. This volume presents several proven and evaluated capacity building measures. Proper workmanship, individual responsi
