

1. Record Nr.	UNINA9910547689403321
Autore	Sinharoy Arindam
Titolo	Environmental Technologies to Treat Rare Earth Element Pollution
Pubbl/distr/stampa	London : , : IWA Publishing, , 2022 ©2021
ISBN	9781789062243 1789062241
Edizione	[1st ed.]
Descrizione fisica	1 online resource (342 pages)
Collana	Integrated Environmental Technology
Altri autori (Persone)	LensPiet
Disciplina	546.41
Soggetti	Rare earth industry - Environmental aspects Rare earth industry Rare earth metals - Environmental aspects Pollution
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Cover -- Contents -- Preface -- List of Contributors -- Part I: Environmental Technologies to Treat Rare Earth Pollution -- Chapter 1: Environmental technologies to treat pollution by rare earth elements -- 1.1 INTRODUCTION -- 1.2 BIOGEOCHEMICAL CYCLES OF RARE EARTH ELEMENTS -- 1.3 RECOVERY OF RARE EARTH ELEMENTS FROM WASTE RESOURCES -- 1.4 TECHNOLOGIES TO RECOVER RARE EARTH ELEMENTS -- 1.5 APPLICATION OF RARE EARTH ELEMENTS AS NANOPARTICLES -- REFERENCES -- Part II: Biogeochemical Cycles of Rare Earth Elements -- Chapter 2: Discovery and occurrence of lanthanoids and yttrium -- 2.1 NAMING AND STRUCTURE OF LANTHANOIDS AND YTTRIUM -- 2.1.1 Nomenclature -- 2.1.2 Structure -- 2.1.3 Other fancy names of REE -- 2.2 HISTORY OF Y AND REE DISCOVERY -- 2.2.1 Discovery of REE -- 2.2.2 Yttrium, Y, 1794 -- 2.2.3 Lanthanum, La, 1839 -- 2.2.4 Cerium, Ce, 1803 -- 2.2.5 Praseodymium, Pr, 1885 -- 2.2.6 Neodymium, Nd, 1885 -- 2.2.7 Promethium, Pm, 1947 -- 2.2.8 Samarium, Sm, 1879 -- 2.2.9 Europium, Eu, 1901 -- 2.2.10 Gadolinium, Gd, 1880 -- 2.2.11 Terbium, Tb, 1843 -- 2.2.12 Dysprosium, Dy, 1886 -- 2.2.13 Holmium, Ho, 1879 -- 2.2.14 Erbium, Er, 1843 -- 2.2.15 Thulium, Tm, 1879 -- 2.2.16 Ytterbium, Yb, 1878 -- 2.2.17 Lutetium, Lu, 1907 --

2.3 PRESENTATION OF THE SUITE OF LANTHANOIDS AND Y -- 2.4
 OCCURRENCE OF LANTHANOIDS AND Y -- 2.4.1 REY in rocks -- 2.4.2
 Analyses of REY in abundant minerals -- 2.4.3 REY distribution in the
 hydrosphere -- 2.5 REY DEPOSITS -- 2.5.1 Geopolitical sources of rare
 earth elements production -- 2.5.2 Endogenic enrichment of REY --
 2.5.2.1 Carbonatites -- 2.5.2.2 Pegmatites -- 2.5.2.3 Mountain pass
 REY deposit -- 2.5.2.4 Bayan Obo REY deposit -- 2.5.2.5 Peralkaline
 igneous deposits -- 2.5.2.6 Hydrothermal vein deposits -- 2.5.3
 Exogenic enrichment -- 2.5.3.1 Regolith-hosted REY deposits --
 2.5.3.2 Ion-adsorbed deposits.
 2.5.3.3 Ocean seabed mud -- 2.5.4 Anthropogenic REY enrichments --
 2.6 SUMMARY -- REFERENCES -- Chapter 3: Occurrence and detection
 of the rare earth elements -- 3.1 INTRODUCTION -- 3.2 MINERALOGY
 OF THE REE -- 3.3 PRIMARY SOURCES OF THE RARE EARTH ELEMENTS
 -- 3.4 PROCESSES INVOLVED IN THE FORMATION OF REE DEPOSITS --
 3.4.1 Igneous processes involved in REE deposit formation -- 3.4.2
 Hydrothermal processes involved in REE deposit formation -- 3.4.3
 Sedimentary, secondary and placer processes -- 3.5 RARE EARTH
 ELEMENT MINERAL DEPOSIT TYPES -- 3.5.1 Carbonatites -- 3.5.2
 Alkaline rocks -- 3.5.3 Granites and rhyolites -- 3.5.4 Iron oxide-
 copper-gold (IOCG) -- 3.5.5 Unconformity-related -- 3.5.6 Placer and
 heavy mineral sands -- 3.5.7 Laterite and ionic clay deposits -- 3.6
 EXPLORATION FOR REE DEPOSITS -- 3.7 CONCLUSIONS -- REFERENCES
 -- Chapter 4: Sources and applications of rare earth elements -- 4.1
 INTRODUCTION -- 4.1.1 Occurrence in different geological systems,
 mineralogy and demand -- 4.1.2 Behavior of REE in different geological
 systems -- 4.2 BRIEF HISTORY OF REE -- 4.3 TYPES OF REE DEPOSITS
 -- 4.3.1 Primary REE deposits -- 4.3.2 Secondary REE deposits --
 4.3.2.1 Ion-adsorption deposits -- 4.3.2.2 Heavy mineral placer
 deposits -- 4.4 ALTERNATE SOURCES FOR REE -- 4.4.1 REE in coal and
 coal fly ash -- 4.4.2 REE in ocean-bottom sediments -- 4.4.3
 Phosphorite deposits -- 4.4.4 REE in river sediments -- 4.4.5 Waste
 rock sources from old and closed mines -- 4.4.6 Red mud -- 4.4.7
 Extraterrestrial REE resources -- 4.4.8 REE from electronic and
 industrial waste -- 4.5 INDUSTRIAL APPLICATIONS -- 4.5.1 Glass
 industry -- 4.5.2 Energy-efficient lighting -- 4.5.3 Rechargeable
 batteries -- 4.5.4 Permanent magnets -- 4.5.5 Electronics -- 4.5.6
 Catalysts -- 4.5.7 Alloys -- 4.5.8 Defense applications -- 4.5.9 REE in
 paints and pigments.
 4.5.10 REE in agriculture -- 4.5.11 REE in medicine -- 4.5.12
 Miscellaneous -- 4.6 LOOKING INTO THE FUTURE -- REFERENCES --
 Part III: Recovery of Rare Earth Elements from Waste Resources --
 Chapter 5: Rare earth elements recovery from secondary sources -- 5.1
 INTRODUCTION -- 5.2 SOURCES OF REE -- 5.2.1 Brine -- 5.2.2 Coal fly
 ash -- 5.3 REE RECOVERY FROM BRINE SOLUTIONS -- 5.4 REE
 RECOVERY FROM COAL FLY ASH -- 5.5 OTHER WASTE SOURCES -- 5.6
 CONCLUSIONS -- REFERENCES -- Chapter 6: Rare earth elements
 recovery from red mud -- 6.1 INTRODUCTION -- 6.2 BAUXITE RESIDUE
 -- 6.2.1 Production -- 6.2.2 Composition -- 6.2.3 Particle size
 distribution of red mud -- 6.3 TECHNOLOGY FOR EXTRACTION OF REES
 FROM BAUXITE RESIDUE -- 6.3.1 Methods for physical beneficiation --
 6.3.1.1 General principle of a hydrocyclone operation process --
 6.3.1.2 General principle of the multi-gravity separator process --
 6.3.1.3 Hydrocyclone and multi-gravity separator for red mud
 treatment -- 6.3.2 Alkali roasting, smelting and leaching -- 6.3.3
 Sulfation, roasting and leaching -- 6.3.4 Direct leaching of mineral acid
 -- 6.3.5 Pre-concentration-acid leaching -- 6.4 REE SEPARATION
 PROCESSES -- 6.4.1 Fractional crystallization and precipitation -- 6.4.2

Ion exchange -- 6.4.3 Solvent extraction -- 6.5 CONCLUSION --
REFERENCES -- Part IV: Technologies to Recover Rare Earth Elements --
Chapter 7 Adsorptive recovery of rare earth elements -- 7.1
INTRODUCTION -- 7.2 REE REMOVAL BY CHEMISORBENTS -- 7.2.1
Silica based adsorbents -- 7.2.2 Nanomaterials -- 7.2.3 Surface
modification -- 7.3 BIOSORBENTS FOR THE RECOVERY OF REE -- 7.3.1
Advantages of biosorbents -- 7.3.2 Algae based biosorbents -- 7.3.3
Agrowaste -- 7.3.3.1 Animal waste -- 7.3.3.2 Plant-based waste --
7.3.4 Activated carbon -- 7.3.5 Hydrogels -- 7.4 DESORPTION FOR THE
RECOVERY OF ADSORBED REE -- 7.5 FUTURE PERSPECTIVE.
7.6 CONCLUSION -- REFERENCES -- Chapter 8: Microbial recovery of
rare earth elements -- 8.1 INTRODUCTION -- 8.2 MICROBIAL
RECOVERY OF RARE EARTH ELEMENTS -- 8.2.1 Bioleaching -- 8.2.2
Rare earth elements microbial interactions as a biorecovery option --
8.2.2.1 Microbial cell wall interaction with rare earth elements --
8.2.2.2 Microbial resistant mechanisms for the recovery of REE --
8.2.2.2.1 Biosorption -- 8.2.2.2.2 Bioaccumulation -- 8.2.2.2.3
Biom mineralization -- 8.2.2.2.4 Bioreduction -- 8.2.3 Selectivity of
enzymes as REE recovery strategy -- 8.2.3.1 The role of REE in
microbial metabolism -- 8.2.3.2 Selectivity of enzymes for REE -- 8.3
CHALLENGES AND FUTURE PERSPECTIVES OF REE BIORECOVERY --
REFERENCES -- Chapter 9: Bioleaching of rare earth elements from
industrial and electronic wastes: mechanism and process efficiency --
9.1 INTRODUCTION -- 9.2 MICROBIAL PROCESSES FOR RECOVERY OF
RARE EARTH ELEMENTS (REE) -- 9.2.1 REE mobilization -- 9.2.1.1
Redoxolysis -- 9.2.1.2 Acidolysis -- 9.2.1.3 Complexolysis -- 9.2.2
REE biorecovery -- 9.2.2.1 Biosorption -- 9.2.2.2 Bioaccumulation --
9.2.2.3 Bioprecipitation -- 9.3 ROLE OF ALGAL AND FUNGAL SPECIES IN
THE RECOVERY OF REE -- 9.3.1 Algae -- 9.3.2 Fungi -- 9.4 MICROBIAL
RECOVERY OF REE FROM DIFFERENT WASTES -- 9.4.1 Coal fly ash --
9.4.2 Electronic wastes -- 9.4.3 Red mud -- 9.5 CONCLUSION --
REFERENCES -- Chapter 10: Biological recovery of rare earth elements
from mine drainage using the sulfidogenic process -- 10.1
INTRODUCTION -- 10.2 REACTIVITY OF REE-BEARING MINERALS --
10.2.1 Reactivity of REE-bearing carbonates -- 10.2.2 Reactivity of
REE-bearing silicates -- 10.2.3 Reactivity of REE-bearing phosphates
-- 10.3 CONVENTIONAL METHODS FOR RECOVERY OF REE -- 10.4 REE-
RICH WASTEWATER ASSOCIATED WITH ACID MINE DRAINAGE -- 10.5
RECOVERY OF REE THROUGH BIOLOGICAL TREATMENT.
10.5.1 SRB treatment of REE-containing mining waste -- 10.5.2
Treatment of phosphogypsum waste leachate -- 10.5.2.1 Bioreactor
performance -- 10.5.2.2 Mineralogy of the REE precipitates -- 10.5.3
Sulfidic treatment of AMD -- 10.5.3.1 Bioreactor performance --
10.5.3.2 Mineralogy of REE precipitates -- 10.5.3.3 Toxicity of REE to
bioreactor sludge -- 10.6 ECONOMIC FEASIBILITY OF REE RECOVERY
FROM SECONDARY SOURCES -- 10.7 FINAL CONSIDERATION --
REFERENCES -- Chapter 11: Plant based removal and recovery of rare
earth elements -- 11.1 INTRODUCTION -- 11.2 SOURCES AND RELEASE
OF REE IN THE ENVIRONMENT -- 11.2.1 Chemical characteristics of REE
-- 11.2.2 Sources of REE -- 11.2.2.1 Natural sources -- 11.2.2.2
Industrial sources -- 11.3 EXTRACTION AND RECOVERY OF REE --
11.3.1 Phytoextraction -- 11.3.1.1 Agromining -- 11.3.1.2 REE plant
uptake -- 11.3.1.3 Sequential extraction of REE from soil -- 11.3.2
Other extraction methods -- 11.4 PHYTOREMEDIATION OF REE --
11.4.1 Plant metabolism for REE phytoremediation -- 11.4.1.1 Plant
species selection -- 11.4.1.2 Bioindicator plants -- 11.4.1.3 REE in
plant metabolism -- 11.4.2 Plants biomass for biosorption -- 11.5
WETLANDS FOR REE RETENTION AND RECOVERY -- 11.5.1 Natural

wetlands -- 11.5.2 Constructed wetlands -- 11.6 CONCLUSIONS --
REFERENCES -- Part V: Application of Rare Earth Elements as
Nanoparticles -- Chapter 12: Rare earth doped nanoparticles and their
applications -- 12.1 INTRODUCTION -- 12.2 BIOMEDICAL
APPLICATIONS -- 12.2.1 Nanoparticles for medical treatment --
12.2.1.1 Hyperthermal therapy -- 12.2.1.2 Magnetic resonance
imaging (MRI) -- 12.2.2 Rare earth doped iron oxide nanoparticles --
12.2.2.1 Iron oxide nanoparticles -- 12.2.2.2 Rare earth nanoparticles
-- 12.2.2.3 Rare earth nanoparticle synthesis -- 12.2.2.3.1 Co-
precipitation -- 12.2.2.3.2 Electrochemical synthesis.
12.2.2.3.3 Thermal decomposition synthesis.

Sommario/riassunto

Rare earth elements (REE) have applications in various modern technologies, e.g., semiconductors, mobile phones, magnets. They are categorized as critical raw materials due to their strategic importance in economies and high risks associated with their supply chain. Therefore, more sustainable practices for efficient extraction and recovery of REE from secondary sources are being developed. This book, *Environmental Technologies to Treat Rare Earth Elements Pollution: Principles and Engineering*, presents the fundamentals of the (bio)geochemical cycles of rare earth elements and which imbalances in these cycles result in pollution. overviews physical, chemical and biological technologies for successful treatment of water, air, soils and sediments contaminated with different rare earth elements. explores the recovery of value-added products from waste streams laden with rare earth elements, including nanoparticles and quantum dots. This book is suited for teaching and research purposes as well as professional reference for those working on rare earth elements. In addition, the information provided in this book is helpful to scientists, researchers and practitioners in related fields, such as those working on metal/metalloid microbe interaction and sustainable green approaches for resource recovery from wastes.
