Disciplina	231.765
Soggetti	Creation Literary criticism Criticism, interpretation, etc.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	The topic of this book is practical knowledge in early modern Europe, interpreted widely as recipes containing art procedures or medical panaceas between 1400 and 1700. In this book, the 1) origin or creation, 2) transmission or dissemination, and 3) use or consumption are key subjects for understanding the place of practical knowledge in early modern European society. After a historiographical and theoretical approach, this book applies Deleuze and Guattari's rhizome metaphor to art technological literature. The first part ends with a study about medical practitioners and mediators who disseminate practical knowledge through the printing press. The second part of the book is entirely dedicated to the booklet <i>A Very Proper Treatise</i> (1573), using a microhistory approach to study it.

2. Record Nr.	UNINA9910557349203321
Autore	Subramanian Subree
Titolo	Cancer Immunology
Pubbl/distr/stampa	Basel, Switzerland, : MDPI - Multidisciplinary Digital Publishing Institute, 2021
Descrizione fisica	1 online resource (316 p.)
Soggetti	Medicine
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	The past decade has seen immunotherapy rise to the forefront of cancer treatment. This Special Issue of Cancers aims to elaborate on the latest developments, cutting-edge technologies, and prospects in cancer immunology and immunotherapy. Seventeen exceptional studies, including original contributions and review articles, written by international scientists and physicians, primarily concerning the fields of tumor biology, cancer immunology, therapeutics, and drug development, comprise the main body of this Special Issue.
