

1. Record Nr.	UNINA9910548272103321
Autore	Rognoli Valentina
Titolo	ICS Materials : Interactive, connected, and smart materials
Pubbl/distr/stampa	Milan, : FrancoAngeli, 2022
Descrizione fisica	1 online resource (224 p.)
Collana	Design International
Soggetti	Product design
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	<p>This present book covers a series of outstanding reputation researchers' contributions on the topic of ICS Materials: a new class of emerging materials with properties and qualities concerning interactivity, connectivity and intelligence. In the general framework of ICS Materials' domain, each chapter deals with a specific aspect following the characteristic perspective of each researcher. As result, methods, tools, guidelines emerged that are relevant and applicable to several contexts such as product, interaction design, materials science and many more.</p>
