

1. Record Nr.	UNINA9910552759403321
Autore	Schuster Joshua
Titolo	Calamity theory : three critiques of existential risk // Joshua Schuster, Derek Woods
Pubbl/distr/stampa	University of Minnesota Press, 2021 Minneapolis ; ; London : , : University of Minnesota Press, , [2021]
ISBN	1-4529-6658-3 1-4529-6699-0
Descrizione fisica	1 online resource (1 online resource 137 p..)
Collana	Forerunners: Ideas First
Disciplina	904
Soggetti	Disasters Human beings - Extinction Risk assessment
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	<p>What are the implications of how we talk about apocalypse? A new philosophical field has emerged. "Existential risk" studies any real or hypothetical human extinction event in the near or distant future. This movement examines catastrophes ranging from runaway global warming to nuclear warfare to malevolent artificial intelligence, deploying a curious mix of utilitarian ethics, statistical risk analysis, and, controversially, a transhuman advocacy that would aim to supersede almost all extinction scenarios. The proponents of existential risk thinking, led by Oxford philosopher Nick Bostrom, have seen their work gain immense popularity, attracting endorsement from Bill Gates and Elon Musk, millions of dollars, and millions of views. Calamity Theory is the first book to examine the rise of this thinking and its failures to acknowledge the ways some communities and lifeways are more at risk than others and what it implies about human extinction. Forerunners: Ideas First is a thought-in-process series of breakthrough digital publications. Written between fresh ideas and finished books, Forerunners draws on scholarly work initiated in notable blogs, social media, conference plenaries, journal articles, and</p>

the synergy of academic exchange. This is gray literature publishing:  
where intense thinking, change, and speculation take place in  
scholarship.
