

1. Record Nr.	UNINA9910553070103321
Autore	Delgado Joao M. P. Q.
Titolo	Moisture transport in polymer composite materials : computational modelling and experiments // J. M. P. Q. Delgado, A. G. Barbosa de Lima
Pubbl/distr/stampa	Cham, Switzerland : , : Springer, , [2022] ©2022
ISBN	3-030-77826-6
Descrizione fisica	1 online resource (109 pages)
Collana	Advanced Structured Materials ; ; v.160
Disciplina	620.192
Soggetti	Composite materials - Testing Polymers - Testing
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Intro -- Preface -- Acknowledgements -- Contents -- 1 Introduction -- 1.1 Motivation -- 1.2 Composite Materials: Fundamentals -- References -- 2 Fundamentals -- 2.1 Natural Fiber-Reinforced Polymer Composites -- 2.2 Water Absorption in Natural Fiber-Reinforced Polymer Composites -- References -- 3 Experimental Analysis -- 3.1 Background -- 3.2 Experimental Setup -- 3.3 Experimental Results Analysis -- 3.3.1 Morphology Characterization of the Fibers -- 3.3.2 Water Absorption Kinetics -- 3.3.3 Mechanical Properties -- References -- 4 Fick's Model Analysis -- 4.1 Transport Phenomena in Porous Media: Foundations -- 4.2 Moisture Absorption by Fick's Model -- 4.2.1 The Physical Problem -- 4.2.2 The General Mass Diffusion Equation -- 4.2.3 The Mass Diffusion Equation: 3D Approach in Cartesian Coordinates -- 4.2.4 Solution Techniques: Three-Dimensional Approach -- 4.2.5 Fick's Model Application -- References -- 5 Langmuir-Type Model Analysis -- 5.1 Fundamentals -- 5.2 Moisture Absorption by Langmuir-Type Model -- 5.2.1 The Physical Problem -- 5.2.2 The General Mass Diffusion Equation -- 5.2.3 The Mass Diffusion Equation: 3D Approach in Cartesian Coordinates -- 5.2.4 The Water Absorption Process: 1D Approach in Cartesian Coordinates -- 5.2.5 The Water Absorption Process: 3D Approach -- References -- 6 Conclusions.
