

1. Record Nr.	UNINA9910553084203321
Autore	Kane Gordon
Titolo	Perspectives on LHC physics // editors, Gordon Kane, Aaron Pierce
Pubbl/distr/stampa	New Jersey, : World Scientific, c2008
ISBN	9786611938147 9781281938145 1281938149 9789812779762 9812779760
Descrizione fisica	1 online resource (352 p.)
Altri autori (Persone)	KaneG. L PierceAaron
Disciplina	539.72 539.7376
Soggetti	Large Hadron Collider (France and Switzerland) Nuclear physics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Contents; Preface; 1. The LHC - A "Why" Machine and a Supersymmetry Factory G. Kane; 1.1 A "Why"Machine; 1.2 A Superpartner Factory; 1.3 Our String Vacuum; 1.4 After the Champagne; 2. Dark Matter at the LHC A. Pierce; 2.1 Introduction; 2.2 Weighing the Universe, or Why Expect Dark Matter?; 2.3 What is the DarkMatter?; 2.4 A Test Case: Supersymmetric Dark Matter; 2.4.1 Neutralinos at the LHC; 2.5 Simple DarkMatter; 2.6 What If We Don't See Dark Matter at LHC?; 2.7 Conclusions; References; 3. LHC's ATLAS and CMS Detectors M. Spiropulu & S. Stapnes; 3.1 Introduction; 3.1.1 LHC: The machine 3.1.2 LHC: Figures of challenge3.2 Detection, Particles and Physics; 3.3 ATLAS and CMS; 3.3.1 ATLAS/CMS duality; 3.3.2 Magnet systems; 3.4 ATLAS and CMS: Challenges Addressed; 3.4.1 Inner detectors; 3.4.2 Calorimetry; 3.4.3 Muon detectors; 3.5 Trigger Architecture; 3.5.1 Googles of data and the grid; 3.6 To Be Continued; References; 4. Understanding the Standard Model, as a Bridge to the Discovery of New Phenomena at the LHC M. L. Mangano; 4.1 Introduction; 4.2 Signals of Discovery; 4.2.1 Mass peaks; 4.2.2 Anomalous shapes of kinematical

distributions; 4.2.3 Counting experiments

4.3 Measuring Parameters 4.4 Conclusions; References; 5. Thoughts on a Long Voyage L. Susskind; 5.1 The Landscape; 5.2 The Hierarchy; 5.3 Linkages; 5.3.1 The strong CP problem; 5.4 Supersymmetry Breaking and the Landscape; 5.5 Black Holes at the LHC?; 6. The "Top Priority" at the LHC T. Han; 6.1 Brief Introduction; 6.2 Top Quark in The Standard Model; 6.2.1 Top-quark decay in the SM; 6.2.2 Top-quark production in the SM; 6.2.2.1.  $t\bar{t}$  production via QCD; 6.2.2.2. Single top production via weak interaction; 6.2.2.3. Top quark and Higgs associated production; 6.3 New Physics in Top-Quark Decay 6.3.1 Charged current decay: BSM 6.3.2 Neutral current decay: BSM; 6.4 Top Quarks in Resonant Production; 6.4.1  $X t\bar{t}, t\bar{b}$ ; 6.4.2  $T t\bar{Z}, t\bar{H}, b\bar{W}$ ; 6.5 Top-Rich Events for New Physics; 6.5.1  $T T$  pair production; 6.5.1.1.  $t\bar{t}$  pure hadronic decay; 6.5.1.2.  $t\bar{t}$  semi-leptonic decay; 6.5.2 Exotic top signatures; 6.6 Summary and Outlook; References; 7. LHC Discoveries Unfolded J. Lykken and M. Spiropulu; 7.1 Escape from Theory Space; 7.2 Dark Matter and Missing Energy; 7.3 Missing Energy at the LHC; 7.4 A Strategy for Early Discovery with Missing Energy; 7.5 Look-Alikes at the Moment of Discovery 7.6 Twenty Questions 7.7 Spin Discrimination with 100 pb<sup>-1</sup>; 7.8 More Look-Alikes; 7.9 Simple Robust Discriminators; 7.10 Outlook; References; 8. From BCS to the LHC S. Weinberg; References; 9. Searching for Gluinos at the Tevatron and Beyond J. Alwall, M.-P. Le, M. Lisanti and J. G. Wacker; 9.1 Introduction; 9.2 Event Generation; 9.2.1 Signal; 9.2.2 Backgrounds; 9.3 Projected Reach of Searches; 9.4 Implications for the LHC; 9.5 Conclusions and Outlook; References; 10. Naturally Speaking: The Naturalness Criterion and Physics at the LHC G. F. Giudice; 10.1 Naturalness in Scientific Thought 10.2 Drowning by Numbers

---

## Sommario/riassunto

The Large Hadron Collider (LHC), located at CERN, Geneva, Switzerland, is the world's largest and highest energy and highest intensity particle accelerator. Here is a timely book with several perspectives on the hoped-for discoveries from the LHC. This book provides an overview on the techniques that will be crucial for finding new physics at the LHC, as well as perspectives on the importance and implications of the discoveries. Among the accomplished contributors to this book are leaders and visionaries in the field of particle physics beyond the Standard Model, including two Nobel Laureates (
