

1. Record Nr.	UNINA9910554208403321
Autore	Bittmann Felix
Titolo	Bootstrapping : an integrated approach with Python and Stata // Felix Bittmann
Pubbl/distr/stampa	Berlin ; ; Boston : , : De Gruyter, , 2021 ©2021
ISBN	9783110693348 3-11-069334-8
Descrizione fisica	1 online resource (viii, 120 pages)
Disciplina	005.133
Soggetti	Python (Computer program language) Computer bootstrapping
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Frontmatter -- Contents -- 1 Basic statistical concepts -- 2 Bootstrapping -- 3 Confidence intervals -- 4 Hypothesis testing -- 5 Regression models -- 6 Applied programming examples -- Bibliography
Sommario/riassunto	Bootstrapping is a conceptually simple statistical technique to increase the quality of estimates, conduct robustness checks and compute standard errors for virtually any statistic. This book provides an intelligible and compact introduction for students, scientists and practitioners. It not only gives a clear explanation of the underlying concepts but also demonstrates the application of bootstrapping using Python and Stata.
