

1. Record Nr.	UNINA9910554214403321
Autore	Oshida Yoshiki
Titolo	Magnesium materials : from mountain bikes to degradable bone grafts // Yoshiki Oshida
Pubbl/distr/stampa	Berlin ; ; Boston : , : De Gruyter, , [2021] Â©2021
ISBN	1-5231-5441-1 3-11-067694-X
Descrizione fisica	1 online resource (832 pages)
Collana	De Gruyter STEM
Disciplina	661.0392
Soggetti	Magnesium Chemistry, Technical Biomedical engineering
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Frontmatter -- Contents -- Prologue -- Chapter 1 Introduction -- Chapter 2 Positioning of magnesium -- Chapter 3 Mg-based alloys -- Chapter 4 Mg-based composites, glassy materials and intermetallics -- Chapter 5 Physical metallurgy -- Chapter 6 Synthesis and casting -- Chapter 7 Thixotechnology -- Chapter 8 Heat treatment and strengthening -- Chapter 9 Formability -- Chapter 10 Forming and product forms -- Chapter 11 Joining -- Chapter 12 Hydrophobicity and wettability -- Chapter 13 Surface modifications -- Chapter 14 Basic properties -- Chapter 15 Superelasticity and superplasticity -- Chapter 16 Nonmedical applications -- Chapter 17 Biological behaviors -- Chapter 18 Biocorrosion and biodegradation -- Chapter 19 Biomedical applications -- Chapter 20 Future perspectives -- Epilogue -- Index
Sommario/riassunto	The book provides an introduction to the topic of magnesium materials for biomedical applications. Additional to the background on magnesium's physical, chemical and mechanical properties, areas of use, related diseases and pathways for biodegradation will be discussed. Also, an outlook of the future of magnesium material applications will be provided.
