

1. Record Nr.	UNISALENT0991003248259707536
Autore	Puder, Arno
Titolo	Distributed systems architecture [electronic resource] : a middleware approach / Arno Puder, Kay Römer, Frank Pilhofer
Pubbl/distr/stampa	Amsterdam ; Boston : Elsevier : Morgan Kaufmann, c2006
ISBN	9781558606487 1558606483
Descrizione fisica	xvi, 323 p. : ill. ; 24 cm.
Altri autori (Persone)	Römer, Kay.author Pilhofer, Frank.author
Disciplina	004.2/2
Soggetti	Electronic data processing - Distributed processing Computer architecture CORBA (Computer architecture) Electronic books.
Lingua di pubblicazione	Inglese
Formato	Risorsa elettronica
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references (p. 313-315) and index.
Nota di contenuto	Preface; 1 Introduction; 2 Basic Concepts; 3 Introduction to CORBA; 4 ORB; 5 ORB Design; 6 Interoperability; 7 Object Adapters; 8 Invocation Adapters; 9 IDL compiler; 10 CORBA and Beyond; Appendix A MICO Installation; B Mico Implementation Overview; C Mico Implementation Details; D Sample Application; List of Figures; Glossary; Bibliography; Index.
Sommario/riassunto	Middleware is the bridge that connects distributed applications across different physical locations, with different hardware platforms, network technologies, operating systems, and programming languages. This book describes middleware from two different perspectives: from the viewpoint of the systems programmer and from the viewpoint of the applications programmer. It focuses on the use of open source solutions for creating middleware and the tools for developing distributed applications. The design principles presented are universal and apply to all middleware platforms, including CORBA and Web Services. The authors have created an open-source implementation of CORBA, called MICO, which is freely available on the web. MICO is one of the most successful of all open source projects and is widely used by

demanding companies and institutions, and has also been adopted by many in the Linux community. * Provides a comprehensive look at the architecture and design of middleware--the bridge that connects distributed software applications * Includes a complete, commercial-quality open source middleware system written in C++ * Describes the theory of the middleware standard CORBA as well as how to implement a design using open source techniques.

Titolo	[Un]Grounding : Post-Foundational Geographies / Friederike Landau, Lucas Pohl, Nikolai Roskamm
Pubbl/distr/stampa	Bielefeld, : transcript Verlag, 2021
ISBN	9783839450734 383945073X
Edizione	[1st ed.]
Descrizione fisica	1 online resource (346 pages) : illustrations (some color)
Collana	Sozial- und Kulturgeographie
Classificazione	RB 10903
Disciplina	307.76
Soggetti	Political Theory Spatial Theory Post-Foundationalism Radical Geography Urban Space Urban Protest Space Geography Social Geography Cultural Geography
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Frontmatter --; Contents --; Introduction --; Theoretical (Re) Positionings --; The World and the Real: --; Encountering Post-Foundationalism in J.K. Gibson-Graham's Space of Pregnant Negativity

--; On Shaky Ground: --; Institution and Dislocation: --; Badiou as a Post-Foundationalist --; Spacing Rancière's Politics --; [Un]Grounding Geographies --; [Un]Grounding Agonistic Public Space: --; Always Geographize! --; The Most Sublime Geographer: --; Modelling the Market as a Socio-Spatial Structure: --; Post-Foundationalism in the City --; (Non)Building Alliances: --; Politicizing Air: --; Materialization of Antidiscipline: --; How Does The [Un]Grounded Interface Generate Possibilities for Spatial Alternatives? --; A Post-Foundational Conception of Politics and Space.

Sommario/riassunto

Post-foundationalism departs from the assumption that there is no ground, necessity, or objective rationale for human political existence or action. The edited volume puts contemporary debates arising from the »spatial turn« in cultural and social sciences in a dialogue with post-foundational theories of space and place to devise post-foundationalism as radical approach to urban studies. This approach enables us to think about space not only as socially produced, but also as crucially marked by conflict, radical negativity, and absence. The contributors undertake a (re-)reading of key spatial and/or post-foundational theorists to introduce their respective understandings of politics and space, and offer examples of post-foundational empirical analyses of urban protests, spatial occupation, and everyday life.

»[The book] provides a stimulating development of a post-foundational spatial theory.«

»[Das Buch] zeigt [nicht nur], dass der Raum eine zentrale Rolle in postfundamentalistischem Denken spielt, sondern, dass eine Auseinandersetzung zwischen Politischer Theorie, human geography und urban studies äußerst fruchtbar zu sein scheint.«

»[The book] creates a series of helpful and often innovative hooks to inspire future post-foundational geographical scholarship.«

»[Un]Grounding creates a series of helpful and often innovative hooks to inspire future post-foundational geographical scholarship.«

»[Un]Grounding provides a stimulating development of a post-foundational spatial theory.«
