| Pubbl/distr/stampa | Berlin, Heidelberg : , : Springer Berlin Heidelberg : , : Imprint : Springer, , 2006 |
| ISBN | 3-540-34099-8 |
| Edizione | [1st ed. 2006.] |
| Descrizione fisica | 1 online resource (XVI, 249 p.) |
| Collana | Programming and Software Engineering ; ; 3950 |
| Disciplina | 005.1 |
| Soggetti | Software engineering Artificial intelligence Computer logic Computer programming Computer communication systems Software Engineering/Programming and Operating Systems Software Engineering Artificial Intelligence Logics and Meanings of Programs Programming Techniques Computer Communication Networks |
| Lingua di pubblicazione | Inglese |
| Formato | Materiale a stampa |
| Livello bibliografico | Monografia |
| Note generali | Bibliographic Level Mode of Issuance: Monograph |
| Nota di bibliografia | Includes bibliographical references and index. |
| Nota di contenuto | Modeling Tools -- Operational Modelling of Agent Autonomy: Theoretical Aspects and a Formal Language -- Hermes: Designing Goal-Oriented Agent Interactions -- Modeling Social Aspects of Multi-Agent Systems: The AML Approach -- Analysis and Validation Tools -- Requirements Elicitation for Agent-Based Applications -- Formalisation and Analysis of the Temporal Dynamics of Conditioning -- Incorporating Commitment Protocols into Tropos -- Multiagent Systems Design -- Zooming Multi-Agent Systems -- Improving AOSE with an Enriched Modelling Framework -- Dealing with Adaptive Multi-agent Organizations in the Gaia Methodology -- Implementing |

Validated Agents Behaviours with Automata Based on Goal
Decomposition Trees -- Implementation Tools -- Dynamically
Generated User-Specified MAS -- Supporting the Development of
Multi-agent Interactions Via Roles -- Automating Model
Transformations in Agent-Oriented Modelling -- Paving the Way for
Implementing Multiagent Systems: Integrating Gaia with Agent-UML --
Applying Multi-agent Concepts to Dynamic Plug-In Architectures --
Experiences and Comparative Evaluations -- Using the Analytic
Hierarchy Process for Evaluating Multi-Agent System Architecture
Candidates -- Estimating Costs for Agent Oriented Software -- Aspects
in Agent-Oriented Software Engineering: Lessons Learned.

Sommario/riassunto

Agent and multiagent concepts offer higher level abstractions and mechanisms which address issues such as knowledge representation and reasoning, communication, coordination, cooperation among heterogeneous and autonomous parties, perception, commitments, goals, beliefs, and intentions all of which need conceptual modeling. The AOSE 2005 workshop sought to examine the credentials of agent-based approaches as a software engineering paradigm, and to gain an insight into what agent-oriented software engineering will look like, and what its benefits will be. This book represents the thoroughly refereed post-proceedings of the 6th International Workshop on Agent-Oriented Software Engineering, AOSE 2005, held in Utrecht, The Netherlands, in July 2005 as part of AAMAS 2005. The 18 revised full papers were carefully selected from 35 submissions during two rounds of reviewing and improvement. The papers are organized in topical sections on modeling tools, analysis and validation tools, multiagent systems design, implementation tools, and experiences and comparative evaluations.

Expanding Interiors: Architectural Photographs of the Countess de Castiglione -- Heidi Brevik-Zender -- II: Bygone Nations and Empires under Construction: Political Imaginations |
| Sommario/riassunto | This book explores ephemeral exhibition spaces between 1750 and |

1918. The chapters focus on two related spaces: the domestic interior and its imagery, and exhibitions and museums that display both national/imperial identity and the otherness that lurks beyond a country's borders. What is revealed is that the same tension operates in these private and public realms; namely, that between identification and self-projection, on the one hand, and alienation, otherness and objectification on the other. In uncovering this, the authors show that the self, the citizen/society and the other are realities that are constantly being asserted, defined and objectified. This takes place, they demonstrate, in a ceaseless dynamic of projection versus alienation, and intimacy versus distancing.
