

1. Record Nr.	UNINA9910554230503321
Autore	Speight James G.
Titolo	Gas engineering . Volume 1 Origin and reservoir engineering / / James G. Speight
Pubbl/distr/stampa	Berlin ; ; Boston : , : Walter de Gruyter GmbH, , [2021] ©2021
ISBN	1-5231-5444-6 3-11-069102-7
Descrizione fisica	1 online resource (486 pages)
Collana	De Gruyter STEM
Disciplina	622.3385
Soggetti	Gas engineering
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Intro -- Preface -- Contents -- Chapter 1 History and background -- Chapter 2 Reservoir fluids and reservoirs -- Chapter 3 Reservoir engineering -- Chapter 4 Production engineering -- Chapter 5 Field operations -- Chapter 6 Production -- Chapter 7 The environment -- Conversion factors and constants -- Glossary -- Appendix A Unconventional gas resources -- Appendix B Illustration of the terms used to describe the resources and reserves of natural gas -- Appendix C Properties of natural gas -- Appendix D Gas cleaning processes -- Appendix E Examples of ASTM test methods for natural gas and gas condensate -- Appendix F Examples of the gas processors association test methods for natural gas -- About the author -- Index.
Sommario/riassunto	Volume 1 deals with the origins of process gases and describes recovery, properties and composition. It covers as well the shale gas, the production from hydrocarbon rich deep shale formations, being one of the most quickly expanding trends in onshore domestic gas exploration. Vol. 2: Composition and Processing of Gas Streams. Vol. 3: Uses of Gas and Effects.
