Sommario/riassunto	From one of our leading scholars of comparative constitutionalism, advice for everyone involved in the surprisingly common practice of constitution-writing. Enhancing prospects for democracy is an important objective in the process of creating a new constitution. Donald L. Horowitz argues that constitutional processes ought to be geared to securing commitment to democracy by those who participate in them. Using evidence from numerous constitutional processes, he makes a strong case for a process intended to increase the likelihood of a democratic outcome. He also assesses tradeoffs among various process attributes and identifies some that might impede democratic outcomes. This book provides a fresh perspective on constitutional processes that will interest students and scholars.
