Nota di contenuto	Russia's "Fascism" or "Illiberalism"? -- The Soviet Legacy in Thinking about Fascism -- Anti-Fascism as the Renewed Social Consensus under Putin -- International Memory Wars : Equating the Soviet Union with Nazism -- The Putin Regime's Ideological Plurality -- Russia's Fascist Thinkers and Doers -- Russia's Honeymoon with the European Far Right -- Why the Russian Regime is not Fascist.
Sommario/riassunto	This volume argues that the charge of 'fascism' has become a strategic narrative of the current world order. Vladimir Putin's regime has increasingly been accused of embracing fascism, supposedly evidenced by Russia's annexation of Crimea, its historical revisionism, attacks on liberal democratic values, and its support for far-right movements in Europe. But at the same time Russia has branded itself as the world's preeminent antifascist power because of its sacrifices during the Second World War while it has also emphasized how opponents to the Soviet Union in Central and Eastern Europe collaborated with Nazi Germany. This book closely analyzes accusations of fascism toward

Russia, soberly assessing both their origins and their accuracy.
