

1. Record Nr.	UNISA996248038803316
Autore	Rosen Charles <1927-2012>
Titolo	The romantic generation [[electronic resource] /] / Charles Rosen
Pubbl/distr/stampa	Cambridge, Mass., : Harvard University Press, 1998, c1995
ISBN	0-674-25590-9
Edizione	[1st Harvard University Press pbk. ed.]
Descrizione fisica	1 online resource (xv, 723 p.) : ill. ;
Disciplina	780/.9/034
Soggetti	Romanticism in music Music - 19th century - History and criticism Romanticism in music - History and criticism - 19th century Music Music, Dance, Drama & Film Music History & Criticism, General
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	"Based on the Charles Eliot Norton Lectures"--Half-title page. Includes index.
Nota di contenuto	Music and sound -- Fragments -- Mountains and song cycles -- Formal interlude -- Chopin: counterpoint and the narrative forms -- Chopin: virtuosity transformed -- Chopin: from the miniature genre to the sublime style -- Liszt: on creation as performance -- Berlioz: liberation from the central European tradition -- Mendelssohn and the invention of religious kitsch -- Romantic opera: politics, trash, and high art -- Schumann: triumph and failure of the romantic ideal.

2. Record Nr.	UNINA9910554251703321
Autore	Bonrath Werner
Titolo	Catalysis for fine chemicals / / Werner Bonrath [and three others]
Pubbl/distr/stampa	Boston, Massachusetts : , : De Gruyter, , [2021] ©2021
ISBN	1-5231-5410-1 3-11-057118-8
Descrizione fisica	1 online resource (404 pages)
Collana	De Gruyter STEM
Disciplina	660.2995
Soggetti	Catalysis Chemical processes
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Frontmatter -- Preface -- Contents -- 1. Introduction and fundamental aspects -- 2 Heterogeneous hydrogenations -- 3 Homogeneous hydrogenations -- 4 Oxidations -- 5 Gas-phase reactions -- 6 C–C-bond and C–N-bond forming reactions (metal-catalysed) -- 7 Rearrangement reactions -- 8 Acid–base-catalysed reactions -- 9 Phase transfer catalysis (PTC) -- 10 Biocatalysis -- 11 New trends -- Index
Sommario/riassunto	A wide range of chemical products (especially fine chemicals) are important for a healthy and enjoyable modern life; therefore efficient syntheses of these materials are essential. Traditional stoichiometric processes need to be replaced by modern catalytical methods in the change to sustainable chemistry and the production of lower amounts of waste. This book summarizes the wide variety of catalytic methods that have been developed and applied on an industrial scale in recent years to fulfill this goal. The synthesis of compound classes such as pharmaceuticals, agrochemicals, flavoring, and fragrance compounds as well as food additives such as vitamins exemplify the use of these modern catalytic methods in the modern chemical industry.
