

1. Record Nr.	UNINA9910554259903321
Autore	Gulaczyk Iwona
Titolo	Theoretical and computational chemistry : applications in industry, pharma, and materials science // Iwona Gulaczyk, Bartosz Tylkowski
Pubbl/distr/stampa	Berlin ; ; Boston, MA : , : Walter de Gruyter GmbH, , [2021] ©2021
ISBN	3-11-067821-7
Descrizione fisica	1 online resource (XII, 258 p.)
Disciplina	542.85
Soggetti	Chemistry - Data processing Cryochemistry
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Frontmatter -- Preface -- Contents -- List of contributing authors -- 1 Computational methods for calculation of protein-ligand binding affinities in structure-based drug design -- 2 Understanding (coupled) large amplitude motions: the interplay of microwave spectroscopy, spectral modeling, and quantum chemistry -- 3 Floppy molecules— their internal dynamics, spectroscopy and applications -- 4 Computational studies on statins photoactivity -- 5 Artificial intelligence in the modeling of chemical reactions kinetics -- 6 Modelling of enzyme kinetics: cellulose enzymatic hydrolysis case -- 7 Computational approach to the study of morphological properties of polymer/fullerene blends in photovoltaics -- 8 Modeling and assessment of the transfer effectiveness in integrated bioreactor with membrane separation -- Index
Sommario/riassunto	This book explores the applications of computational chemistry ranging from the pharmaceutical industry and molecular structure determination to spectroscopy and astrophysics. The authors detail how calculations can be used to solve a wide range of practical challenges encountered in research and industry.
