

1. Record Nr.	UNINA9910554266703321
Titolo	Urban design methods : integrated urban research tools // Undine Giseke [and four others] (editors)
Pubbl/distr/stampa	Berlin : , : Jovis, , [2021] ©2021
ISBN	3-86859-955-X
Descrizione fisica	1 online resource (256 p.)
Disciplina	307.1216
Soggetti	City planning
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Includes index.
Nota di contenuto	Frontmatter -- Contents -- # A.1 urban design as a changing profession -- # A.2 some notes about interdisciplinarity -- # A.3 external statements -- # A.4 working across geographical boundaries: reflecting on sino-german cooperation in urban design -- # B. how to read this book -- Introduction -- # B.1 understanding spatial practices -- # B.2 diagrammatic sketching -- # B.3 unpacking discourses -- # B. 4 experimenting -- # B.5 interviewing experts -- # B.6 mapping spatial systems -- # B.7 urban data mining -- # B.8 analyzing pictures -- # B. 9 using questionnaires -- # B.10 applying ANT -- # B.11 understanding typologies and morphologies -- # B.12 viewing the urban through an ethnographic lens -- # B.13 analyzing and visualizing actors -- # B.14 getting lost: unfolding creative thinking -- # B.15 narrating through graphics -- # B.16 adding, dividing, superimposing -- # B.17 creating conceptual models -- # B.18 intervening through system thinking -- # B.19 designing grid principles -- # B.20 producing and reducing complexity -- # B.21 engaging humans and nonhumans in design -- # B.22 building knowledge through charrettes -- # B.23 participation and enactment games -- # B.24 visualizing possible futures -- # B.25 urban coding -- # B.26 curating evolutionary landscapes -- # B.27 co-designing and building -- index of authors -- imprint
Sommario/riassunto	Urban Design Methods is a manual for reconciling contemporary approaches with increasingly complex demands in the shaping of urban

living spaces. Architects and landscape architects, as well as city, regional, and landscape planners, often find that they are unable to do modern projects justice with their specialist skills alone. Cooperative approaches are needed to deal with both the complexity of raising questions and the growing number of affected parties who need to be involved. Urban design-understood as an inter- and transdisciplinary field at the interface of architecture, city and regional planning, landscape architecture, sociology, and the diverse stakeholders involved in any project-requires a compendium of adaptable methods to dissolve the boundaries between theory and praxis and between natural and social systems. For the first time, this book collects a broad spectrum of methods intended to support urban designers in deciphering the contexts in which they work, and help them attain a greater individual professional understanding. It clearly outlines the range of challenges and the constantly evolving areas of activity. Urban Design Methods ist ein Handbuch, das zeitgenössische Herangehensweisen an die immer komplexer werdenden Anforderungen bei der Gestaltung urbaner Lebensräume vermittelt. Oft erfahren Architekt*innen, Landschaftsarchitekt*innen, Stadt-, Regional- und Landschaftsplaner*innen, dass sie heutigen Aufgaben mit ihren fachspezifischen Kenntnissen nicht wirklich gerecht werden können. Die Komplexität der Fragestellungen und die wachsende Zahl der betroffenen und zu beteiligenden Akteure erfordert kooperative Ansätze. Urban Design, verstanden als ein inter- und transdisziplinäres Tätigkeitsgebiet im Schnittfeld von Architektur, Stadt- und Regionalplanung, Landschaftsarchitektur, Soziologie und vielfältigen lebensweltlichen Akteuren, braucht ein Kompendium poröser Methoden, mit deren Hilfe die Grenzen zwischen Theorie und Praxis, zwischen natürlichen und sozialen Systemen aufgelöst werden. Dieses Buch versammelt erstmals ein weites Spektrum von Methoden, die Urban Designer dabei unterstützen sollen, den Kontext, in dem sie arbeiten, zu dechiffrieren und ein individuelles Berufsverständnis zu finden. Es umreißt anschaulich die Bandbreite der Herausforderungen und die beständig neu zu definierenden Handlungsfelder.

2.	Record Nr.	UNICAMPANIAVAN0011687
	Titolo	Inquinamento elettromagnetico ad alta frequenza : aspetti tecnici, sanitari e normativi : campi elettromagnetici generati da sistemi fissi di telecomunicazione e dispositivi elettronici / a cura di Paolo Bevitori ; testi di Daniele Andreuccetti ... [et al.]
	Pubbl/distr/stampa	Rimini, : Maggioli, c2000
	ISBN	88-387-1564-5
	Descrizione fisica	424 p. ; 24 cm.
	Disciplina	628.5
	Soggetti	Inquinamento elettromagnetico
	Lingua di pubblicazione	Italiano
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
3.	Record Nr.	UNICAMPANIAVAN00061816
	Autore	Wittkower, Rudolf
	Titolo	Allegoria e migrazione dei simboli / Rudolf Wittkower ; introduzione di Giovanni Romano
	Pubbl/distr/stampa	Torino, : G. Einaudi, 1987
	ISBN	88-06-59351-0
	Descrizione fisica	LII, 353 p. : ill. ; 22 cm
	Disciplina	704.946
	Soggetti	Allegorie Simboli
	Lingua di pubblicazione	Italiano
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
	Note generali	Trad. di Marcello Ciccuto
