Sommario/riassunto	Over the past few decades, China has increasingly challenged the global influence of the United States. In this book, David B.H. Denoon brings together a group of eminent scholars to explain China's rapid

ascendance on the world stage, as well as its future implications for global politics. Contributors address the military, economic, diplomatic, and internal political factors shaping China's strategy, in addition to highlighting Beijing's objectives in different parts of the world, such as Central Asia, Africa, and the Middle East.
