

1. Record Nr.	UNINA9910554486303321
Autore	Schilling Alexander
Titolo	Basics modelbuilding / / Alexander Schilling
Pubbl/distr/stampa	Basel : , : Birkhauser, , 2017
ISBN	3-0356-2190-X
Edizione	[Third edition.]
Descrizione fisica	1 online resource (80 p.)
Collana	Basics
Disciplina	720.228
Soggetti	Architectural models Architectural student handbook Architecture
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Frontmatter -- Contents -- Foreword -- The architectural model as a means of representation -- Types of models -- Design and concept development -- Equipment, tools and techniques -- Materials -- From drawing to model – steps and approaches -- In conclusion -- Appendix
Sommario/riassunto	Modelle ermöglichen eine räumliche Vorstellung des Konzeptes. Das Entwerfen am Modell und das Präsentieren von Konzepten ist ein wichtiger Schritt in der Bildung eines Entwurfsbewusstseins. Themen: Abstraktionsgrade und Detailtiefe Modelltypologien Typische Arbeitsmittel und -techniken Materialität von Modellen Präsentationsmöglichkeiten Models are spatial presentations of architectural concepts, miniature representations of the proposed buildings. Better than any drawing or computer simulation, they help to create a better spatial impression of the projected building, because anybody looking at a model can select the angle of view and thereby obtain a personal impression of the space. Designing and presenting a design concept with the help of a model is an important step in creating an awareness of the intended design. Basics Model Building provides students with concise knowledge of model typologies, materials, tools, and techniques for the professional creation of working and presentation models. The new edition of this successful volume has been updated and supplemented, in particular in the field of digital model building.
