

1. Record Nr.	UNINA9910554845603321
Autore	Pumain Denise
Titolo	Geographical modeling : cities and territories // edited by Denise Pumain
Pubbl/distr/stampa	London : , : ISTE Limited Hoboken, New Jersey : , : John Wiley & Sons, Incorporated, , 2020 ©2019
ISBN	1-119-68727-6 1-119-68726-8 1-119-68729-2
Edizione	[1st edition]
Descrizione fisica	1 online resource (207 pages) : illustrations, maps
Collana	Modeling methodologies in social sciences set ; ; Volume 2
Disciplina	910.285
Soggetti	Geographic information systems MATHEMATICS - General
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Sommario/riassunto	The modeling of cities and territories has progressed greatly in the last 20 years. This is firstly due to geographic information systems, followed by the availability of large amounts of georeferenced data – both on the Internet and through the use of connected objects. In addition, the rise in performance of computational methods for the simulation and exploration of dynamic models has facilitated advancement. Geographical Modeling presents previously unpublished information on the main advances achieved by these new approaches. Each of the six chapters builds a bibliographic review and precisely describes the methods used, highlighting their advantages and discussing their interpretations. They are all illustrated by many examples. The book also explains with clarity the theoretical foundations of geographical analysis, the delicate operations of model selection, and the applications of fractals and scaling laws. These applications include gaining knowledge of the morphology of cities and the organization of urban transport, and finding new methods of building and exploring simulation models and visualizations of data

and results.
