

1. Record Nr.	UNINA9910555015803321
Autore	Gong Liu-Zhu
Titolo	Asymmetric organo-metal catalysis : concepts, principles, and applications // Liu-Zhu Gong
Pubbl/distr/stampa	Weinheim, Germany : , : Wiley-VCH, , [2022] ©2022
ISBN	3-527-34594-9 3-527-34593-0 3-527-34596-5
Descrizione fisica	1 online resource (347 pages)
Disciplina	660.2995
Soggetti	Catalysts
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Cover -- Title Page -- Copyright -- Contents -- Preface -- Chapter 1 Why Is Organo/Metal Combined Catalysis Necessary? -- 1.1 Introduction -- 1.2 Early Stage of Organo/Metal Combined Catalysis and General Principles -- 1.3 Organo/Metal Cooperative Catalysis -- 1.3.1 Control of Stereochemistry -- 1.3.2 Cooperative Activation of Chemical Bonds -- 1.4 Organo/Metal Relay and Sequential Catalysis -- 1.5 Conclusion -- References -- Chapter 2 Metal/PhaseTransfer Catalyst Combined Catalysis -- 2.1 Introduction -- 2.1.1 Early Racemic Examples: PTC and Transition Metal Cocatalyzed Reactions -- 2.2 Asymmetric Metal/PhaseTransfer Catalyst Combined Catalysis -- 2.2.1 Combination of Cationic PTC and Transition Metal in Asymmetric Catalysis -- 2.2.2 Combination of Anionic PTC and Transition Metal in Asymmetric Catalysis -- 2.3 Conclusion -- References -- Chapter 3 EnamineMetal Combined Catalysis -- 3.1 Introduction: Combined Enamine Activation and Metal Catalysis -- 3.2 Catalytic Asymmetric Allylation of Carbonyls -- 3.2.1 Oxidative AdditionInitiated Allylic Alkylation -- 3.2.2 Metal HydrideInitiated Allylic Alkylation -- 3.2.3 Lewis AcidMediated SN1 or SN2 Reaction -- 3.3 Catalytic Asymmetric Substitution -- 3.4 Catalytic Asymmetric Alkenylation, Arylation, and Trifluoromethylation of Carbonyl Compounds -- 3.5 Asymmetric Addition to Alkynes by Cooperative Catalysis with Lewis Acids -- 3.6

Catalytic Asymmetric Propargylic Substitution Reaction of Carbonyl Compounds -- 3.7 Catalytic Asymmetric Oxidation of Aldehydes -- 3.8 Relay Catalysis -- 3.8.1 Catalytic Asymmetric Cross Dehydrogenative Coupling -- 3.8.2 Transformation of Olefins -- 3.9 Conclusion -- References -- Chapter 4 Iminium and Metal Combined Catalysis -- 4.1 Introduction: Iminium Activation and Metal Combined Catalysis -- 4.2 Iminium Activation and Palladium Catalysis. 4.2.1 Enantioselective Conjugate Addition Reaction -- 4.2.2 Asymmetric [3+2] Cycloaddition Via RingOpening Oxidative Addition -- 4.2.3 Asymmetric Michael Addition and Carbocyclization Cascade -- 4.2.4 Asymmetric Oxidative Cascade Reaction -- 4.3 Iminium Activation and Coinage Metal Catalysis -- 4.4 Iminium Activation and Other Metal Catalysis -- 4.5 Conclusion -- References -- Chapter 5 Brønsted Acid and Transition Metal Cooperative Catalysis -- 5.1 Introduction -- 5.2 Early Stage of Metal/Brønsted Acid Cooperative Catalysis -- 5.3 Metal AlkynylideMediated Transformations -- 5.4 AllylMetalMediated Transformation -- 5.5 Asymmetric Hydrogenation of C N Double Bond -- 5.6 Metal CarbeneMediated Transformations -- 5.7 Lewis Acid Mediated Transformations -- 5.8 Summary and Outlook -- References -- Chapter 6 MetalBrønsted Acid Relay Catalysis -- 6.1 Introduction -- 6.2 Lewis AcidChiral Brønsted Acid Relay Catalysis -- 6.2.1 HydroaminationInitiated Cascade Reaction -- 6.2.2 Hydroalkoxylation Mediated Relay Catalysis -- 6.2.3 Hydrosilylation Mediated Relay Catalysis -- 6.2.4 Relay Catalysis Involving the Addition of Nitrene or Nitro Group to Alkynes -- 6.2.5 Relay Catalysis Involving the Addition of Carbon Nucleophiles to Alkynes -- 6.3 Metal/Brønsted Acid Relay Catalysis Involving Alkene Metathesis -- 6.4 Metal/Brønsted Acid Relay Catalysis Involving Alkene Isomerization -- 6.5 Metal/Brønsted Acid Relay Catalysis Involving Hydrogenation -- 6.6 Palladium/Brønsted Acid Relay Catalytic Asymmetric Allylation of Carbonyls -- 6.7 Metal/Brønsted Acid Relay Catalysis Involving Hydroformylation -- 6.8 Metal/Brønsted Acid Relay Catalysis Involving Metal Carbene Formation -- 6.8.1 Cascade Metal Carbene Formation and Asymmetric Protonation -- 6.8.2 Multiple Cascade Reaction Initiated with Metal Carbene. 6.9 Lewis Acid/Chiral Brønsted Acid Relay Catalysis -- 6.10 Miscellaneous -- 6.11 Summary and Outlook -- References -- Chapter 7 Lewis Base-Lewis Acid Cooperative Catalysis -- 7.1 Introduction: Combined Lewis Base and Lewis Acid Activations -- 7.1.1 Early Examples in Lewis Base-Lewis Acid Cooperative Catalysis -- 7.2 Asymmetric Reactions Driven by Tertiary AmineMediated Ammonium Enolates -- 7.2.1 Asymmetric Baylis-Hillman Reactions -- 7.2.2 Asymmetric [2+2] Reactions -- 7.2.3 Asymmetric [4+2] Reactions -- 7.2.4 Asymmetric Functionalization of Carbonyl Compounds -- 7.3 Asymmetric Reactions Driven by NHCMediated Homo-enolates -- 7.3.1 Asymmetric Annulation Reactions -- 7.3.2 Asymmetric Protonation Reactions -- 7.3.3 Asymmetric Kinetic Resolutions -- 7.4 Asymmetric Reactions Driven by NHCMediated Azolium Enolates -- 7.5 Asymmetric Reactions Driven by Ammonium Salts -- 7.6 Asymmetric Reactions Driven by NHCMediated ,Unsaturated Acyl Azoliums -- 7.6.1 Asymmetric [3+3] Reactions -- 7.6.2 Asymmetric Cascade Reactions -- 7.6.3 Asymmetric Kinetic Resolutions -- 7.7 Conclusion -- References -- Chapter 8 Lewis BaseTransition Metal Cooperative Catalysis -- 8.1 Introduction -- 8.2 Phosphine and Transition Metal Cooperative Catalysis -- 8.3 NHeterocyclic Carbene and Transition Metal Cooperative Catalysis -- 8.3.1 Allyl Metal Mediated Transformations -- 8.3.2 Alkynylmetal Mediated Transformations -- 8.3.3 Metal allenylidene Mediated Transformations -- 8.4 Tertiary Amine and

Transition Metal Cooperative Catalysis -- 8.4.1 Allyl Metal Mediated Transformations -- 8.4.2 Benzylmetal Mediated Transformations -- 8.4.3 Metalallenylidene Mediated Transformations -- 8.4.4 Other Transition Metal Mediated Transformations -- 8.5 Conclusions -- References -- Chapter 9 Chiral Organocatalyst Combined with Transition Metal Based Photoredox Catalyst.

9.1 Introduction -- 9.2 CovalentBased Organocatalytic Activation in Combination with Transition MetalBased Photoredox Catalyst -- 9.2.1 Chiral Amine/Photoredox Combined Catalysis -- 9.3 Photoredox Mediated SOMO Catalysis -- 9.4 Nucleophilic Organocatalyst in Combination with Photoredox Catalyst -- 9.5 NoncovalentBased Organocatalytic Activation in Combination with Transition MetalBased Photoredox Catalyst -- 9.5.1 Chiral Phosphate/Photoredox Combined Catalysis -- 9.6 Asymmetric IonPair/Photoredox Combined Catalysis -- 9.7 Summary and Outlook -- References -- Chapter 10 Applications in Organic Synthesis -- 10.1 Introduction -- 10.2 Applications of Chiral Phosphoric AcidMetal Cooperative Catalysis -- 10.3 Application of Transition Metal Catalysis Combined with Secondary Amine Catalysis -- 10.4 Application of Photocatalysis Combined with Organocatalysis -- 10.5 Application of Lewis Base-Lewis Acid Cooperative Catalysis -- 10.6 Application of Lewis Base-Transition Metal Relay Catalysis -- 10.7 Application of MetalBrønsted Acid Relay Catalysis -- 10.8 Conclusion -- References -- Index -- EULA.
