

1. Record Nr.	UNINA9910555054803321
Titolo	Recycling from waste in fashion and textiles : a sustainable and circular economic approach // editors, Pintu Pandit [et al.]
Pubbl/distr/stampa	Hoboken, NJ : , : Wiley-Scrivener Publishing, , 2020
ISBN	1-119-62052-X 1-119-62053-8 1-119-62051-1
Descrizione fisica	1 online resource (xxiii, 464 pages)
Disciplina	746.92
Soggetti	Fashion design - Environmental aspects Textile industry - Environmental aspects
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Preface xxi 1 Overview on Recycling from Waste in Fashion and Textiles: A Sustainable and Circular Economic Approach 1; Pintu Pandit, Kunal Singha, Sanjay Shrivastava and Shakeel Ahmed 1.1 Introduction 2 1.2 Importance of Recycling 3 1.3 Challenges in Designing With Post-Consumer Clothing and Benefits of Recycling 4 1.4 The Market for Upcycled Fashion Garments 6 1.5 Recycling Fashion Manufacturers 6 1.6 Sustainable Fibers and Technologies in Textiles and Fashions 7 1.7 The Circular Economy 9 1.8 The Main Characteristic of the Economy 9 1.8.1 Natural Fibers 10 1.8.1.1 Cotton 10 1.8.1.2 Bast Fibers: Flax, Linen, Jute, And Hemp 10 1.8.1.3 Wool 11 1.8.1.4 Silk 11 1.9 Eco-Labels Concerning Bringing Sustainability 12 1.10 Technological and Sustainable Measures Under Fashion Industry 13 1.11 Consumer Consciousness Along With Corporate Social Obligation 13 1.12 Sharing Economy and Collaborative Consumption 14 1.13 Technological Amendments in Textiles Making It More User Friendly and Environment Friendly 15 1.14 Conclusions 16 References 17 2 Challenges for Waste in Fashion and Textile Industry 19; Jayant Kumar, Kunal Singha, Pintu Pandit, Subhankar Maity and Amal Ray 2.1 Introduction 20 2.1.1 Annual Global Fiber Consumption (2000-2012) 21 2.2 Major Challenges in Managing Textile and Fashion Wastages 24 2.3 Usage of Renewable Resources to the Maximum 29 2.4 Increase the Life of the Product 29

2.4.1 Machinery/Equipment Related 29 2.4.2 Process Related 30 2.4.3 Chemicals and Dyes 30 2.4.4 Wastewater Treatment 30 2.5 Conclusions 31 References 31 3 Solutions for Sustainable Fashion and Textile Industry 33; Ritu Pandey, Pintu Pandit, And Restriction of Chemicals (REACH) 64 3.11.3 Toxic Substance Control Act (TSCA) 64 3.11.4 Publicly Available Specification (PAS) 2050 65 3.11.5 Indian Standard for Organic Textiles (ISOT) 66 3.11.6 Organic Crop Improvement Association (OCIA) 66 3.11.7 Government Green Procurement (GGP) in Taiwan 66 3.11.8 Sustainable Resolution (Su. Re) in India 66 3.11.9 Eco-Labels for Sustainable Textiles 69 3.12 Conclusion 69 References 70 4 Opportunities of Agro and Biowaste in Fashion Industry 73; Seiko Jose, Lata Samant, Relation to Natural Dyes 85 4.4.3 Sources of Natural Dyes From Various Agro/Biowastes 86 4.4.4 Application of Natural Dyes in Fashion Industry 87 4.4.4.1 Few Case Studies 88 4.4.5 Agro-Wastes for Color Removal 89 4.4.5.1 Removal of Dyes by Low-Cost Sorbents: Few Case Studies 90 4.4.6 Consumer Approach Towards Naturally Dyed Fashion Garments 93 4.4.7 Fashion Brands Approach to Promote Natural Dyed Apparels 94 4.5 Conclusion 94 References 95 5 Innovating Opportunities for Fashion Brands by Using Textile Waste for Better Fashion 101; Vandana Gupta, Madhvi Arora and Jasmine Minhas 5.1 Introduction 102 5.2 Textile and Apparel Industry 103 5.3 Carbon Foot Prints and Waste Generation From Textile and Apparel Industries 105 5.3.1 Carbon Foot Prints 105 5.3.2 Fashion and Waste Facts 107 5.4 Fashion Brands Working Towards Sustainability Using Textile Waste 109 5.4.1 Anokhi 110 5.4.2 Wills Vegan 110 5.4.3 Everlane 112 5.4.4 Doodlage 112 5.4.5 Abraham and Thakore 113 5.4.6 Osklen 114 5.4.7 Raeburn 115 5.4.8 Stella McCartney 115 5.4.9 Bottletop 115 5.4.10 Rustic Hue 116 5.4.11 Zero Waste Daniel 116 5.4.12 Raw Mango 116 5.4.13 Patagonia 116 5.4.14 Ka-Sha 117 5.5 Conclusion 117 References 118 6 Challenges and Opportunities of Waste in Handloom Textiles 123; Pintu Pandit, Sanjay Shrivastava, Sankar Roy Maulik

Sommario/riassunto

"The alarming level of greenhouse gases in the environment, fast depleting natural resources such as water, petroleum products and the increasing level of industrial effluents have made every single manufacturing activity come under the scrutiny of sustainability. When all kinds of waste such as clothes, old furniture, carpets, televisions, shoes, paper, food wastes etc. end up in the landfill, only a few of them are naturally decomposed and thus a large majority remains as non-biodegradable. It is for this reason, efforts are concentrated to reduce the burden on earth by this waste, and as far as used textile products are concerned, there are now attempts to recycle or up-cycle. At the same time, people in third world countries do not have access to sufficient clothing whereas those in developed countries are following the policy of make-use and throw."-- Provided by publisher
