

1. Record Nr.	UNINA9910555089903321
Titolo	Oil and oilseed processing : opportunities and challenges // edited by Tomas Lafarga, Gloria Bobo, Ingrid Aguilo-Aguayo
Pubbl/distr/stampa	Hoboken, New Jersey : , : Wiley, , [2021] ©2021
ISBN	1-119-57533-8 1-119-57526-5 1-119-57531-1
Descrizione fisica	1 online resource (303 pages)
Collana	IFST Advances in Food Science
Disciplina	665.2
Soggetti	Oilseeds
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	"Oil and Oilseed Processing will review existing conventional and novel 'green' extraction methods to extract oils from seeds, reinforcing the positive aspects of some operations in the processing oil and oilseeds and presenting the new processing concepts, principles, effects on quality and stability characteristics, limitations and challenges. In addition, vegetable and animal-derived oils are of interest for industrial applications because of their similarity with plant oils and for their economic overproduction of seed oils and nutritional value. Current application and future perspectives for their utilization in the food and non-food industry will be presented. Finally, safety concerns regarding oil and oilseed processing and waste valorisation is an issue of high apprehension, will be deeply discussed in the book. This book will be of interest to researchers in oilseed production, research and development personnel, food scientist, plant breeders, product development personnel, and government agency personnel involved in the production, transportation, distribution and processing of oilseed." --
