

1. Record Nr.	UNINA9910555108803321
Titolo	Anion-binding catalysis / / edited by Olga Garcia Mancheno
Pubbl/distr/stampa	Weinheim, Germany : , : Wiley-VCH, , [2022] ©2022
ISBN	3-527-83065-0 3-527-83064-2 3-527-83066-9
Descrizione fisica	1 online resource (416 pages)
Disciplina	572
Soggetti	Bioorganic chemistry Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Cover -- Title Page -- Copyright -- Contents -- Preface -- List of Abbreviations -- Chapter 1 From Anion Recognition to Organocatalytic Chemical Reactions -- 1.1 Introduction and Background -- 1.1.1 Evolution of ThioureaBased Catalysts -- 1.1.2 Evolution of Triazole Based Catalysts -- 1.1.3 Progress on HalogenBindingBased Catalysts -- 1.1.4 Miscellaneous AnionBinding Catalysts -- 1.2 Concepts in AnionBinding Catalysis -- 1.2.1 Introduction -- 1.2.2 AnionBinding Catalysis in Addition Reactions -- 1.2.3 AnionBinding Catalysis in Substitution Reactions -- 1.2.4 Anion Binding in Cooperative Catalysis -- 1.2.5 AnionBinding in Lewis Acid Enhancement Catalysis -- 1.2.6 AnionBinding in Phase Transfer Catalysis -- 1.3 Summary and Outlook -- Acknowledgment -- References -- Chapter 2 Anion Recognition and Binding Constant Determination -- 2.1 Introduction to Supramolecular Chemistry and Binding Constant Determination -- 2.1.1 Chapter Overview -- 2.1.2 Supramolecular Chemistry and Its Connection to AnionAssisted Catalysis -- 2.1.3 Brief History of Advances in Supramolecular Anion Binding -- 2.1.4 Predicting the Model of Association and Simulating the Expected Species Distribution Profiles and Binding Curves -- 2.2 Equilibrium Constants, Binding Curves, Titration Conditions, and Errors -- 2.2.1 Physical Origins of Equilibrium

Binding Constants -- 2.2.2 Explanation of the Basis for Titration Techniques and Binding Curves -- 2.2.3 Hirose's Rule and Picking the Right Concentration, Solvent, and Technique -- 2.2.4 Error Determination -- 2.3 Experimental Techniques: NMR Spectroscopy -- 2.3.1 When to Use -- 2.3.2 Slow Exchange vs. Fast Exchange -- 2.3.3 Determination of the Underlying Equilibria -- 2.3.4 Software for Non linear Regression Fitting -- 2.3.5 Common Issues -- 2.4 Experimental Techniques: UV-Vis Spectroscopy -- 2.4.1 When to Use. 2.4.2 Physical Origins of Optical Phenomena -- 2.4.3 Software for Non linear Regression Analysis of UV-Vis Titrations -- 2.4.4 Common Issues -- 2.5 Underappreciated Concerns in Binding Constant Determination: Multiple Binding Equilibria -- 2.5.1 When to Expect Additional Equilibria -- 2.5.2 How to Diagnose Additional Equilibria -- 2.5.3 How to Account for Additional Equilibria -- 2.6 Underappreciated Concerns in Binding Constant Determination: Ion Pairing -- 2.6.1 When to Expect Ion Pairing -- 2.6.2 Role of Solvent and Concentration in Ion Pairing -- 2.6.3 How to Diagnose Ion Pairing -- 2.7 Underappreciated Concerns in Binding Constant Determination: Kinetic Processes -- 2.8 Connecting Equilibrium Constants to Structures and Catalysis -- 2.9 Conclusion -- Acknowledgment -- References -- Chapter 3 (Thio)urea and SquaramideCatalyzed AnionBinding Catalysis with Halogen Anions -- 3.1 Introduction -- 3.2 History and Background -- 3.3 Asymmetric Catalysis by Catalyst Association with the Electrophile -- 3.3.1 Examples Utilizing the NAcyliminium Chloride Ion Pair -- 3.3.1.1 Pictet-Spengler Reaction and Variants -- 3.3.1.2 Intramolecular Cyclizations with Other (Hetero)aromatic Nucleophiles -- 3.3.1.3 Intramolecular and Intermolecular azaSakurai Reaction -- 3.3.1.4 Mannich Reaction and Variants -- 3.3.1.5 PetasisType Reactions -- 3.3.2 Examples Utilizing Electrophiles Other than NAcyliminium Ion Precursors -- 3.3.2.1 Utilization of Oxocarbenium and Pyrone Intermediates -- 3.3.2.2 Glycosylation Reactions Utilizing HBD-Halide Binding -- 3.3.2.3 Utilization of NonheteroatomStabilized Carbocations as Electrophiles -- 3.4 Asymmetric Catalysis by Catalyst Association with the Nucleophile -- 3.4.1 CatalystNucleophile Association in PhaseTransfer Catalysis -- 3.4.1.1 Investigation of HydrogenBonded Fluoride: Structure and Reactivity. 3.4.1.2 Development of HydrogenBonding PhaseTransfer Catalysis (HBPTC) -- 3.4.1.3 Development of AcylTransfer Catalysis with HydrogenBonded Fluoride -- 3.4.2 Catalyst-Nucleophile Association in Homogeneous Catalysis -- 3.5 Conclusions and Outlook -- Acknowledgments -- References -- Chapter 4 Chiral Ureas, Thioureas, and Squaramides in AnionBinding Catalysis with Cocatalytic Brønsted/Lewis Acids -- 4.1 Introduction -- 4.2 Carboxylic Acid Co catalysts -- 4.3 Sulfonic Acid Cocatalysts -- 4.4 Mineral Acid Co catalysts -- 4.5 Lewis Acid Cocatalysts -- 4.6 Conclusions and Outlook -- References -- Chapter 5 AnionBinding Catalysis with Other Anions -- 5.1 Introduction -- 5.2 Cyanide Anion -- 5.2.1 Strecker Reaction -- 5.2.2 Acylcyanation of Imines -- 5.3 OxygenBased Anions -- 5.3.1 Alkoxides and Enolates -- 5.3.2 Enolates of Lactones, Cyclic Anhydrides, and Imides -- 5.3.3 Carboxylates -- 5.4 Conclusions and Outlook -- References -- Chapter 6 Silanediols, Phosphoramides, and Other OH and NHBased HDonor Catalysts -- 6.1 Introduction -- 6.2 Silanediols -- 6.2.1 Introduction -- 6.2.2 Overview of Silanols in Anion Binding and Catalysis -- 6.2.3 Silanediol AnionBinding Catalysis -- 6.2.4 AlkoxySilanediol Anion Binding Catalysis -- 6.3 Siloxanes -- 6.4 Thiophosphoramides -- 6.5 Cyclodiphosphazanes -- 6.6 Other Examples -- 6.6.1 Xanthene-Diamine Scaffold -- 6.6.2 Croconamides -- 6.6.3 PyrroleBased AnionBinding Catalyst -- 6.6.4 Bisamidine

Catalysts -- 6.7 Conclusions -- References -- Chapter 7 1,2,3
Triazoles and 1,2,3-Triazolium Ions as Catalysts -- 7.1 Introduction --
7.2 Triazole-Based Anion-Binding Molecular Catalysts -- 7.3 Triazolium
Ions as Organic Molecular Catalysts with Anion-Binding Ability -- 7.4
Triazolium Ions in Dual Functional Catalysts -- 7.5 Conclusion --
References.
Chapter 8 Quaternary Ammonium, Phosphonium, and Tertiary
Sulfonium Salts as Hydrogen-Bonding Catalysts -- 8.1 Introduction --
8.2 Hydrogen-Bonding Ability of Quaternary Ammonium Salts -- 8.3
Hydrogen-Bonding Catalysis of Quaternary Ammonium Salts -- 8.4
Hydrogen-Bonding Catalysis of Quaternary Phosphonium Salts -- 8.5
Hydrogen-Bonding Catalysis of Tertiary Sulfonium Salts -- 8.6
Conclusion -- References -- Chapter 9 Assisted and Dual Anion
Binding in Amino and Nucleophilic Catalysis -- 9.1 Dual Amino/H-Bond
Donor Catalysis -- 9.1.1 Enamine Activation -- 9.1.2 Dienamine
Activation -- 9.1.3 Iminium Ion Activation -- 9.1.4 Vinylogous Iminium
Ion Activation -- 9.2 Thiourea - Pyridine-Based Nucleophilic Dual
Catalysis -- 9.2.1 Kinetic Resolution and Desymmetrization of Amines
-- 9.2.2 Asymmetric Steglich Rearrangement -- 9.2.3 Other Acylation
Reactions -- 9.2.4 Anion-Binding-Assisted Polymerization Reactions --
9.3 Conclusions -- References -- Chapter 10 Anion-Binding Catalysis
by Halogen, Chalcogen, Pnictogen, and Tetrel Bonding -- 10.1 History
of Halogen Bonding -- 10.2 History of Chalcogen Bonding -- 10.3
History of Pnictogen and Tetrel Bonding -- 10.4 Differences Between
Hydrogen Bonding and Other Secondary Interactions -- 10.5 Secondary
Bonding in Anion Recognition -- 10.6 Halogen Bonding in Anion
Binding Catalysis -- 10.7 Chalcogen Bonding in Anion-Binding Catalysis
-- 10.8 Pnictogen and Tetrel Bonding in Anion-Binding Catalysis --
10.9 Conclusion -- References -- Chapter 11 New Trends and
Supramolecular Approaches in Anion-Binding Catalysis -- 11.1 General
Introduction -- 11.2 Dual Photoredox and Anion-Binding Catalysis --
11.3 Combination of Metal and Anion-Binding Catalysis -- 11.3.1
Anion-Binding Assisted Hydrogenation Reactions -- 11.3.2
Hydroformylation Reactions -- 11.3.3 Anion-Binding - Metal-Catalyzed
C-C Forming Reactions.
11.4 Supramolecular Approaches Involving Anion-Binding Catalysis --
11.4.1 Mechanically Interlocked Molecules in Anion-Binding Catalysis --
11.4.1.1 Molecular Knots as Anion-Binding Catalysts -- 11.4.1.2
Rotaxanes as Anion-Binding Catalysts -- 11.4.2 Molecular Motors in
Anion-Binding Catalysis -- 11.4.3 Macrocycles in Anion-Binding
Catalysis -- 11.5 Anion- Catalysis -- 11.5.1 Anion-Catalyzed
Kemp Elimination Reaction -- 11.5.2 Anion- Interactions in Enolate
Chemistry -- 11.5.3 Epoxide-Opening - Ether Cyclization Reactions --
11.5.4 Enantioselective Anion- Catalysis -- 11.5.5 Miscellaneous --
11.6 Conclusion and Outlook -- References -- Index -- EULA.
