

1. Record Nr.	UNINA9910555113003321
Titolo	Handbook of assisted and amendment-enhanced sustainable remediation technology // edited by Majeti N. V. Prasad
Pubbl/distr/stampa	Hoboken, New Jersey : , : Wiley, , [2021] ©2021
ISBN	1-119-67038-1 1-119-67039-X 1-119-67037-3
Descrizione fisica	1 online resource (659 pages)
Disciplina	628.4
Soggetti	Phytoremediation Soil remediation Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Cover -- Title Page -- Copyright -- Contents -- List of Contributors -- Preface -- Part I Global Scenario of Remediation and Combined Clean Biofuel Production -- Chapter 1 Global Remediation Industry and Trends -- 1.1 Introduction -- 1.1.1 Rise of Phytoremediation -- 1.1.2 The Phytoremediation Industry -- 1.1.3 The Key Players in Global Remediation and Phytoremediation -- 1.1.3.1 Markets by Sector -- 1.1.3.2 Markets by Application -- 1.1.3.3 Sizes of Market Sectors Potentially Available to Phytoremediation -- 1.2 Global -- 1.3 Mining in Latin America and Phytoremediation Possibilities -- Acknowledgements -- References -- Chapter 2 Sustainable Valorization of Biomass: From Assisted Phytoremediation to Green Energy Production -- 2.1 Introduction -- 2.2 Bioenergy: The Role of Biomass -- 2.3 Assisted Phytoremediation: Valorization of Biomass -- 2.4 Assisted PhytoremediationBioenergy: An Integrated Approach -- 2.5 Conclusions -- References -- Part II BiocharBased Soil and Water Remediation -- Chapter 3 Biochar - Production, Properties, and Service to Environmental Protection against Toxic Metals -- 3.1 Introduction -- 3.2 How to Produce Biochar -- 3.3 Biochar Properties -- 3.4 Biochar in

the Service of Environmental Protection -- 3.5 Soil Characteristics -- 3.6 Environmental Hazards Caused by Heavy Metals -- 3.7 Characteristics of Selected Heavy Metals -- 3.8 Zinc -- 3.9 Copper -- 3.10 Lead -- 3.11 Cadmium -- 3.12 Soil Pollution -- 3.13 What Is Remediation and What Is it for? -- 3.14 Improving Soil Properties -- 3.15 Removal of Impurities -- 3.16 The Addition of Biochar to Contaminated Soils may be Such a Solution -- 3.17 Summary -- References -- Chapter 4 Biocharbased Water Treatment Systems for Clean Water Provision -- 4.1 Introduction -- 4.2 Synthesis of Biochar -- 4.2.1 Pyrolysis Process -- 4.2.2 Pyrolysis Technology -- 4.3 Biochar Properties. 4.3.1 Biochar Surface Chemistry -- 4.3.2 Pyrolysis Effect on Chemical Properties of Biochar -- 4.3.3 Pyrolysis Effect on Physical Properties of Biochar -- 4.4 Mechanism of Adsorption -- 4.4.1 Heavy Metal Removal Mechanism -- 4.4.2 Organic Contaminants Removal Mechanism -- 4.4.3 Pathogenic Organism Removal Mechanism -- 4.5 Factors Affecting Adsorption of Contaminants on Biochar -- 4.5.1 Biochar Properties -- 4.5.2 Post Treatment or Modification -- 4.5.3 Solution pH -- 4.5.4 Coexisted Ions -- 4.5.5 Dosage of Adsorbents -- 4.5.6 Temperature -- 4.5.7 Contact Time -- 4.5.8 Initial Concentration of Pollutants -- 4.6 BiocharBased Water Treatment Systems -- 4.6.1 Biochar Supply -- 4.6.2 Biochar Use -- 4.6.3 Regeneration -- 4.6.3.1 Thermal Regeneration -- 4.6.3.2 Solvent Regeneration -- 4.6.3.3 Microwave Irradiation Regeneration -- 4.6.4 Supercritical Fluid Regeneration -- 4.6.5 Sustainability of Biochar Utilization -- References -- Chapter 5 Biochar for Wastewater Treatment -- 5.1 Biochar Production and Its Characteristics -- 5.2 Modification of Biochar -- 5.3 Comparison of Biochar with Activated Carbon -- 5.4 Biochar Adsorption Mechanism -- 5.5 Adsorption Kinetics of Aqueous Phase Organic Compounds -- 5.6 Influence of pH, Temperature, and Biochar Dose on the Adsorption Process -- 5.7 Biochar Technology in Wastewater Treatment -- 5.8 Summary -- Acknowledgment -- References -- Chapter 6 Biochar for Bioremediation of Toxic Metals -- 6.1 The Idea of Using Biochar with the Assumption of Closed Circulation -- 6.2 The Role of Biochar in Soil General Information -- 6.3 Biochar as a Sorbent - Physical and Structural Composition -- 6.4 The Role of Biochar in Removing Heavy Metals from Soil -- 6.5 Utilization of Selected Heavy Metals from Soil -- 6.6 Mechanism of Heavy MetalsBiochar -- 6.7 Summary -- Acknowledgment -- References. Chapter 7 Biochar Assisted Remediation of Toxic Metals and Metalloids -- 7.1 Introduction -- 7.2 Biochar and its Remarkable Physical Chemical and Biological Properties -- 7.2.1 Physical Properties of Biochar -- 7.2.1.1 Density and Porosity -- 7.2.1.2 Surface Area of Biochar -- 7.2.1.3 Pore Volume and Pore Size Distribution -- 7.2.1.4 Water Holding Capacity and Hydrophobicity -- 7.2.1.5 Mechanical Stability -- 7.2.2 Chemical Properties -- 7.2.2.1 Atomic Ratios -- 7.2.2.2 Elemental Composition -- 7.2.2.3 Energy Content -- 7.2.2.4 Fixed Carbon and Volatile Matter -- 7.2.2.5 Presence of Functional Groups -- 7.2.2.6 pH of Biochar -- 7.2.2.7 Cation Exchange Capacity -- 7.2.3 Biological Properties of Biochar -- 7.2.3.1 Biochar as a Habitat for Soil Microorganisms -- 7.2.3.2 Biochar as a Substrate for the Soil Biota -- 7.3 Heavy Metal Pollutants -- 7.4 Interactions between Biochar and Heavy Metal -- 7.4.1 Types of Interactions Occurs between Biochar and Heavy Metals -- 7.4.1.1 Direct Interaction -- 7.4.1.2 Electrostatic Attractions -- 7.4.1.3 Ion Exchange -- 7.4.1.4 Complexation -- 7.4.1.5 Precipitation -- 7.4.1.6 Sorption -- 7.4.1.7 Indirect Interactions -- 7.4.1.8 Biochar Metal Interactions -- 7.5 Biochar as a Bioremediator

-- 7.5.1 Bioremediation of Heavy Metals Pollutant by the Use of Microorganism and Biochar -- 7.5.2 Bioremediation of Heavy Metal Pollutants by the Use of Plants and Biochar -- 7.5.3 Bioremediation of Heavy Metals Pollutant through the Combination of Biochar, Plant, and Microorganism -- 7.6 Application of Biochar in Bioremediation of Mining Area -- 7.6.1 Application of Biochar in Bioremediation of Acid Mine Wastes -- 7.6.2 Alkaline Tailing Soils -- 7.7 Limitation of Biochar Amended Bioremediation -- 7.7.1 Phytoextraction of Arsenic -- 7.7.2 Phytoremediation of Sewage Sludge -- 7.8 Conclusion -- References.

Chapter 8 Use of Biochar as an Amendment for Remediation of Heavy Metal Contaminated Soils -- 8.1 Introduction -- 8.2 Biochar Production Conditions -- 8.3 Modification to Improve Remediation Potential of Biochar -- 8.4 Mechanism of Metal Immobilization by Biochar -- 8.4.1 Direct Biochar-Heavy Metal Interaction -- 8.4.1.1 Electrostatic Attraction -- 8.4.1.2 Ion Exchange -- 8.4.1.3 Complexation -- 8.4.1.4 Precipitation -- 8.4.2 Indirect Biochar-Heavy Metals-Soils Interactions -- 8.4.2.1 Impact on Soil pH, CEC, and Organic Carbon Content, thus Metal Mobility -- 8.4.2.2 Impacts on Soil Mineral Composition and Metal Mobility by Biochar Application -- 8.5 Immobilization of Heavy Metals by Biochar -- 8.6 Application of Biochar for Immobilization of Heavy Metals and Enhancement of Plant Growth -- 8.7 Conclusions -- References -- Chapter 9 Biochars for Remediation of Recalcitrant Soils to Enhance Agronomic Performance -- 9.1 Introduction -- 9.2 Biochar Properties -- 9.2.1 Production -- 9.2.2 Properties -- 9.3 Application and Impact of Biochar on Soils -- 9.3.1 Biochar in Soil Carbon Sequestration -- 9.3.2 Influence on Soil Physical and Chemical Properties -- 9.3.3 Influence on Microbial Activity and Soil Biota -- 9.4 Conclusions -- Acknowledgment -- References -- Chapter 10 Biochar Amendment Improves Crop Production in Problematic Soils -- 10.1 Introduction -- 10.2 Roles of Biochar in Soil Improvement -- 10.2.1 Physical Characteristics -- 10.2.2 Chemical Properties -- 10.2.3 Biological Indices -- 10.3 Other Roles of Biochar -- 10.4 Agricultural Productivity in Biochar Amended Soil -- 10.4.1 Advantages of Using Biochar as a Soil Supplement -- 10.5 Reclamation of Degraded Soils Using Biochar -- 10.6 Conclusions -- References -- Part III Organic Amendments Use in Remediation.

Chapter 11 Use of Organic Amendments in Phytoremediation of Metal Contaminated Soils: Prospects and Challenges -- 11.1 Agricultural Organic Waste -- 11.2 Forestry ByProducts -- 11.3 Composts -- 11.4 Sewage Sludge/Biosolids -- 11.5 Humic Substances -- 11.6 Biochar -- 11.7 Constructed OrganicDerived Soils -- 11.8 Directions for Future Research -- Acknowledgments -- References -- Chapter 12 Rice Husk and Wood Derived Charcoal for Remediation of Metal Contaminated Soil -- 12.1 Introduction -- 12.2 Heavy Metal Contamination in Soils -- 12.3 Rice Husk Ash (RHA) - Production, Characteristics, and Application -- 12.3.1 Utilization of Rice Husk Ash as Soil Amendment and Metal Removal -- 12.4 Charcoal - Production and Applications -- 12.4.1 Charcoal as Amendment and Metal Removal -- 12.5 Conclusion -- References -- Chapter 13 Enhanced Composting Using Woody Biomass and Its Application in Wasteland Reclamation -- 13.1 Introduction -- 13.2 Composting Process -- 13.3 Types of Composting -- 13.4 Woody Biomass Waste as Cocomposting Material -- 13.4.1 Usage of Woody Biochar in Composting -- 13.4.2 Woody BiocharMicrobial Consortia -- 13.4.3 Usage of Wood Ash in Composting -- 13.4.4 Usage of Wood Derived Materials in Composting -- 13.5 Advantages and Disadvantages of Composting Woody Biomass -- 13.6 Application of Woody Biomass Compost in Restoration of Wastelands -- 13.7 Conclusion -- Acknowledgment -- References -- Chapter 14 Sewage

Sludge as Soil Conditioner and Fertilizer -- 14.1 Introduction -- 14.2
Sewage Sludge from Wastewater Treatment Plants -- 14.2.1 Soil
Remediation Practices -- 14.2.2 Sewage Sludge in the Remediation of
Degraded Soils -- 14.2.2.1 Sewage Sludge as a Source of NPK -- 14.2.3
Substrates Produced or Based on Sewage Sludge-Biosolids -- 14.2.4
Biosolids as Fertility Restorer and Conditioner.
14.2.5 Impact of Sewage Sludge and Biosolids on Soil Microorganisms.
