

1. Record Nr.	UNISA996493770803316
Autore	BALL, John <1585-1640.>
Titolo	A short treatise containing all the principal grounds of Christian religion : By way of questions and answers, very profitable for all sorts of men, but especially for housholders. : Whereunto are added several questions by the reverend author's own pen: to clear the exposition: as you may perceive by the epistle to the reader
Pubbl/distr/stampa	[London], : Imprinted at London, for John Wright ..., 1656
Edizione	[La 15. stampa, più corretto del [sic] il primo]
Descrizione fisica	Testo elettronico (PDF) ([24], 349, [2] p.)
Disciplina	283
Soggetti	Chiese anglicane
Lingua di pubblicazione	Inglese
Formato	Risorsa elettronica
Livello bibliografico	Monografia
Note generali	Attribuito a John Ball da Wing "Al lettore" firmato: Simeon Ashe. Altri autori di contributi: Ashe, Simeon, d. 1662. Riproduzione dell'originale nella Peterborough Cathedral.

2. Record Nr.	UNINA9910555250703321
Autore	Choi Byungcho
Titolo	Pulsewidth modulated DC-to-DC power conversion : circuits, dynamics, control, and DC power distribution systems / / Byungcho Choi
Pubbl/distr/stampa	Hoboken, New Jersey : , : John Wiley & Sons, Inc., , [2022] ©2022
ISBN	1-119-45447-6 1-119-45448-4 1-119-45444-1
Edizione	[Second edition.]
Descrizione fisica	1 online resource (723 pages)
Disciplina	621.3132
Soggetti	DC-to-DC converters Pulse-duration modulation PWM power converters
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Cover -- Title Page -- Copyright -- Contents -- Author Biography -- Preface -- Chapter 1 PWM DctoDc Power Conversion -- 1.1 PWM Dc toDc Power Conversion -- 1.1.1 DctoDc Power Conversion -- 1.1.2 PWM Technique -- 1.2 Standalone DctoDc Power Conversion System -- 1.2.1 Dc Source with Nonideal Characteristics -- 1.2.2 DctoDc Converter as Voltage Source -- 1.2.3 Load as Dynamic Current Sink -- 1.3 Features and Issues of PWM DctoDc Converter -- 1.3.1 DctoDc Power Converter Circuits -- 1.3.2 Dynamic Modeling and Analysis -- 1.3.3 Dynamic Performance and Control Design -- 1.4 Dc Power Distribution Systems -- 1.4.1 Structure of Dc Power Distribution Systems -- 1.4.2 Issues in Dc Power Distribution System Analysis and Design -- 1.5 Chapter Highlights -- 1.5.1 Part I: DctoDc Converter Circuits -- 1.5.2 Part II: Modeling and Dynamics of PWM Converters -- 1.5.3 Part III: Control Schemes and Converter Performance -- 1.5.4 Part IV: Dc Power Distribution Systems -- Part I DctoDc Power Converter Circuits -- Chapter 2 Buck Converter -- 2.1 Ideal StepDown DctoDc Power Conversion -- 2.2 Buck Converter: StepDown DctoDc Converter -- 2.2.1 Evolution to Buck Converter -- 2.2.2 Frequency

Domain Analysis -- 2.3 Buck Converter in Startup Transient -- 2.3.1
 Piecewise Linear Analysis -- 2.3.2 Startup Response -- 2.4 Buck
 Converter in Steady State -- 2.4.1 Circuit Analysis Techniques --
 2.4.1.1 Piecewise Linear Analysis -- 2.4.1.2 SmallRipple
 Approximation -- 2.4.1.3 Flux Linkage Balance Condition and Charge
 Balance Condition -- 2.4.2 SteadyState Analysis -- 2.4.3 Evaluation of
 Output Voltage Ripple -- 2.4.3.1 Evaluation with Ideal Capacitor --
 2.4.3.2 Effects of Parasitic Resistance of Capacitor -- 2.5 Buck
 Converter in Discontinuous Conduction Mode -- 2.5.1 Origin of
 Discontinuous Conduction Mode Operation -- 2.5.2 Conditions for
 DCM Operation.
 2.5.3 SteadyState Operation in DCM -- 2.6 ClosedLoop Control of
 Buck Converter -- 2.6.1 ClosedLoop Feedback Controller -- 2.6.1.1
 Pulsewidth Modulation -- 2.6.1.2 Voltage Feedback Circuit -- 2.6.2
 Transient Responses of ClosedLoop Controlled Buck Converter --
 2.6.2.1 Step Input Response -- 2.6.2.2 Step Load Response -- 2.6.2.3
 Operational Mode Change Response -- 2.7 Chapter Summary --
 Problems -- Chapter 3 DctoDc Power Converter Circuits -- 3.1 Boost
 Converter -- 3.1.1 Evolution to Boost Converter -- 3.1.2 SteadyState
 Analysis in CCM -- 3.1.2.1 SteadyState Operation in CCM -- 3.1.2.2
 Estimation of Output Voltage Ripple -- 3.1.3 SteadyState Analysis in
 DCM -- 3.1.4 Effects of Parasitic Resistance on Voltage Gain -- 3.2
 Buck/Boost Converter -- 3.2.1 Evolution to Buck/Boost Converter --
 3.2.2 SteadyState Analysis in CCM -- 3.2.2.1 SteadyState Operation in
 CCM -- 3.2.2.2 Estimation of Output Voltage Ripple -- 3.2.3 Steady
 State Analysis in DCM -- 3.3 Three Basic Converters -- 3.3.1 Structure
 and Operation of Three Basic Converters -- 3.3.2 Voltage Gain of Three
 Basic Converters -- 3.4 Flyback Converter: TransformerIsolated
 Buck/Boost Converter -- 3.4.1 Evolution to Flyback Converter -- 3.4.2
 SteadyState Analysis in CCM -- 3.4.3 SteadyState Analysis in DCM --
 3.5 BridgeType BuckDerived Isolated DctoDc Converters -- 3.5.1
 Switch Network and MultiWinding Transformer -- 3.5.1.1 Switch
 Network Structure -- 3.5.1.2 Circuit Models for Multiwinding
 Transformers -- 3.5.2 FullBridge Converter -- 3.5.2.1 Operation with
 Ideal Transformer -- 3.5.2.2 Effects of Magnetizing Inductance -- 3.5.3
 HalfBridge Converter -- 3.5.4 Push-Pull Converter -- 3.6 Forward
 Converters -- 3.6.1 Basic Operational Principles -- 3.6.1.1 Reset
 Problem and Reset Circuit -- 3.6.1.2 Switch Network with Zener Diode
 Reset.
 3.6.1.3 Switch Network with Tertiary Winding Reset -- 3.6.2 Tertiary
 Winding Reset Forward Converter -- 3.6.3 TwoSwitch Forward
 Converter -- 3.7 Chapter Summary -- Reference -- Problems -- Part II
 Modeling and Dynamics of PWM Converters -- Chapter 4 Modeling
 PWM DctoDc Converters -- 4.1 Overview of PWM Converter Modeling
 -- 4.1.1 Power Stage Modeling -- 4.1.2 PWM Block Modeling -- 4.1.3
 Voltage Feedback Circuit and SmallSignal Model of PWM Converter --
 4.2 Averaging Power Stage Dynamics -- 4.2.1 StateSpace Averaging
 Method -- 4.2.1.1 Switched StateSpace Model and Switching Function
 -- 4.2.1.2 Continuous Duty Ratio and Averaged StateSpace Model --
 4.2.2 Circuit Averaging Technique -- 4.2.2.1 Averaging Switch Drive
 Signal -- 4.2.2.2 Procedure of Circuit Averaging -- 4.2.2.3 PWM Switch
 -- 4.2.2.4 Averaging PWM Switch -- 4.2.2.5 Average Models for Three
 Basic PWM Converters -- 4.2.3 Circuit Averaging and StateSpace
 Averaging -- 4.3 Linearizing Averaged Power Stage Dynamics -- 4.3.1
 Linearization of Nonlinear Function and SmallSignal Model -- 4.3.1.1
 SingleVariable Nonlinear Functions -- 4.3.1.2 MultipleVariable
 Nonlinear Functions -- 4.3.2 SmallSignal Model of PWM Switch-The
 PWM Switch Model -- 4.3.3 SmallSignal Model of Converter Power

Stage -- 4.4 Frequency Response of Converter Power Stage -- 4.4.1 Sinusoidal Response of Power Stage -- 4.4.2 Frequency Response and sdomain SmallSignal Model -- 4.5 Generalization of Power Stage Modeling -- 4.5.1 Power Stage Modeling with Parasitic Resistances -- 4.5.1.1 Buck Converter with Ideal Voltage Source -- 4.5.1.2 Buck Converter with Input Filter -- 4.5.1.3 Linearization of Averaged PWM Switch Equation -- 4.5.1.4 Predictions of Refined SmallSignal Model -- 4.5.2 Modeling PWM Converters in DCM Operation -- 4.5.2.1 Averaged Equations for PWM Switch in DCM. 4.5.2.2 Linearization of Averaged Equation and SmallSignal Circuit Model -- 4.5.3 Modeling Isolated PWM Converters -- 4.5.3.1 Modeling Forward Converter and BridgeType Converters -- 4.5.3.2 Modeling Flyback Converter -- 4.6 SmallSignal Gain of PWM Block -- 4.7 Universal SmallSignal Model for PWM DctoDc Converters -- 4.7.1 Voltage Feedback Circuit -- 4.7.1.1 Output Voltage Control -- 4.7.1.2 Voltage Feedback Compensation -- 4.7.2 Universal SmallSignal Model for PWM Converters -- 4.8 Chapter Summary -- References -- Problems -- Chapter 5 Power Stage Transfer Functions -- 5.1 Bode Plot for Transfer Functions -- 5.1.1 Basic Definitions -- 5.1.1.1 Transfer Function -- 5.1.1.2 Frequency Response -- 5.1.1.3 Polar Plot and Bode Plot Representations -- 5.1.2 Bode Plots for Multiplication Factors -- 5.1.2.1 Constant -- 5.1.2.2 Single and Double Integration Functions -- 5.1.2.3 Single and Double Differentiation Functions -- 5.1.2.4 Single Pole and Single Zero Functions -- 5.1.2.5 Double Pole and Double Zero Functions -- 5.1.2.6 RHP Pole and RHP Zero Functions -- 5.1.3 Bode Plot Construction for Transfer Functions -- 5.1.3.1 Examples of Bode Plot Construction -- 5.1.3.2 Nonminimum Phase System -- 5.1.4 Identification of Transfer Function from Bode Plot -- 5.2 Power Stage Transfer Functions of Three Basic Converters in CCM Operation -- 5.2.1 Power Stage Transfer Functions of Buck Converter -- 5.2.1.1 InputtoOutput Transfer Function -- 5.2.1.2 Duty RatiotoOutput Transfer Function -- 5.2.1.3 Load CurrenttoOutput Transfer Function -- 5.2.2 Power Stage Transfer Functions of Boost Converter -- 5.2.2.1 InputtoOutput Transfer Function -- 5.2.2.2 Duty RatiotoOutput Transfer Function and RHP Zero -- 5.2.2.3 Load CurrenttoOutput Transfer Function -- 5.2.2.4 Functional Origin of RHP Zero -- 5.2.3 Power Stage Transfer Functions of Buck/Boost Converter. 5.3 Power Stage Transfer Functions in DCM Operation -- 5.3.1 Evaluation of DCM Transfer Functions -- 5.3.2 Analysis of DCM Duty RatiotoOutput Transfer Function -- 5.4 Power Stage Transfer Functions of Isolated Converters -- 5.4.1 TertiaryWinding Reset Forward Converter -- 5.4.2 Flyback Converter -- 5.5 Empirical Methods for SmallSignal Analysis -- 5.6 Chapter Summary -- Reference -- Problems -- Chapter 6 Dynamic Performance of PWM DctoDc Converters -- 6.1 Stability -- 6.2 FrequencyDomain Performance Criteria -- 6.2.1 Loop Gain -- 6.2.2 Audiosusceptibility -- 6.2.3 Output Impedance -- 6.3 TimeDomain Performance Metrics -- 6.3.1 Step Load Response -- 6.3.2 Step Input Response -- 6.4 Stability of Dc toDc Converters -- 6.4.1 Stability of Linear TimeInvariant Systems -- 6.4.1.1 Definition of BIBO Stability -- 6.4.1.2 Unit Impulse Function and Impulse Response -- 6.4.1.3 Impulse Response and BIBO Stability -- 6.4.1.4 Pole Locations and BIBO Stability -- 6.4.2 SmallSignal Stability of DctoDc Converters -- 6.5 Nyquist Criterion -- 6.5.1 Theoretical Foundation of Nyquist Criterion -- 6.5.1.1 Contour Mapping from s plane to F(s)plane -- 6.5.1.2 Cauchy's Theorem -- 6.5.2 Proof of Cauchy's Theorem -- 6.5.2.1 Proof of Fact I and Fact II -- 6.5.2.2 Cauchy's Theorem to Evaluate RHP Roots in $1+T(s)$ -- equals -- 0 -- 6.5.3 Nyquist Stability Criterion -- 6.5.4 Application of Nyquist

Stability Criterion to DctoDc Converters -- 6.6 Relative Stability: Gain Margin and Phase Margin -- 6.7 Chapter Summary -- Problems -- Part III Control Schemes and Converter Performance -- Chapter 7 Feedback Compensation and ClosedLoop Performance-Voltage Mode Control -- 7.1 Asymptotic Analysis Method -- 7.1.1 Concept of Asymptotic Analysis Method -- 7.1.2 Examples of Asymptotic Analysis Method -- 7.1.2.1 Procedures for Asymptotic Analysis.
7.2 Analysis of FrequencyDomain Performance in CCM.
