

1. Record Nr.	UNINA9910555256703321
Titolo	Facing hydrometeorological extreme events : a governance issue // edited by Isabelle La Jeunesse, Corinne Larrue
Pubbl/distr/stampa	Hoboken, New Jersey ; ; Chichester, West Sussex, England : , : Wiley, , [2020] ©2020
ISBN	1-119-38346-3 1-119-38356-0 1-119-38355-2
Descrizione fisica	1 online resource (576 pages)
Collana	Hydrometeorological extreme events
Disciplina	363.3492
Soggetti	Hydrometeorology - Government policy
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Includes index.
Sommario/riassunto	"This book will first present a synthesis of hydrometeorological extreme events and their impacts on society; it will then show how societies are organizing themselves to face these extreme events. It will focus on the strategies of integration of risk management in governance and public policy. Theory will be systematically illustrated by real-life success stories of multilevel governance. The book will focus on several governance dimensions: individuals involved in extreme events at various decision-making systems, strategies and policy instruments, and also the resources mobilized in decision-making processes. Global initiatives such as the Sendai Framework for Disaster Risk Reduction (2015-2030) adopted at the Third UN World Conference in Sendai, Japan in March 2015 will be referenced; as well as supporting a vision of possibilities as developed by the working group on climate change of the Common Implementation Strategy of the Water Framework Directive. This book is unique because it focuses on success stories of multilevel governance decision-making processes for managing hydro-meteorological extreme events at catchment scales. It will include the results of several EU-funded projects

addressing hydrometeorological extreme events such as CLIMB,
STARFLOOD and INTERREG IVB project DROP"--
