

1. Record Nr.	UNINA9910555265903321
Autore	Dincer Ibrahim <1964->
Titolo	Thermal energy storage : systems and applications / / Ibrahim Dincer, Marc A. Rosen
Pubbl/distr/stampa	Hoboken, New Jersey ; ; Chichester, England : , : John Wiley & Sons, Inc., , [2021] ©2021
ISBN	1-119-71314-5 1-119-71317-X 1-119-71316-1
Edizione	[Third edition.]
Descrizione fisica	1 online resource (674 pages)
Disciplina	621.4028
Soggetti	Heat storage Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Cover -- Title Page -- Copyright Page -- Contents -- Preface -- Acknowledgments -- Chapter 1 Basic Introductory Thermal Aspects -- 1.1 Introduction -- 1.2 Systems of Units -- 1.3 Fundamental Properties and Quantities -- 1.3.1 Mass, Time, Length, and Force -- 1.3.2 Pressure -- 1.3.3 Temperature -- 1.3.4 Specific Volume and Density -- 1.3.5 Mass and Volumetric Flow Rates -- 1.4 General Aspects of Thermodynamics -- 1.4.1 Thermodynamic Systems -- 1.4.2 Process -- 1.4.3 Cycle -- 1.4.4 Thermodynamic Property -- 1.4.5 Sensible and Latent Heats -- 1.4.6 Latent Heat of Fusion -- 1.4.7 Vapor -- 1.4.8 Thermodynamic Tables -- 1.4.9 State and Change of State -- 1.4.10 Specific Internal Energy -- 1.4.11 Specific Enthalpy -- 1.4.12 Specific Entropy -- 1.4.13 Pure Substance -- 1.4.14 Ideal Gases -- 1.4.15 Energy Transfer -- 1.4.16 Heat -- 1.4.17 Work -- 1.4.18 The First Law of Thermodynamics -- 1.4.19 The Second Law of Thermodynamics -- 1.4.20 Reversibility and Irreversibility -- 1.4.21 Exergy -- 1.5 General Aspects of Fluid Flow -- 1.5.1 Classification of Fluid Flows -- 1.5.2 Viscosity -- 1.5.3 Equations of Flow -- 1.5.4 Boundary Layer -- 1.6 General Aspects of Heat Transfer -- 1.6.1 Conduction Heat Transfer -- 1.6.2 Convection Heat Transfer -- 1.6.3 Radiation Heat Transfer --

1.6.4 Thermal Resistance -- 1.6.5 The Composite Wall -- 1.6.6 The Cylinder -- 1.6.7 The Sphere -- 1.6.8 Conduction with Heat Generation -- 1.6.9 Natural Convection -- 1.6.10 Forced Convection -- 1.7  
Concluding Remarks -- Nomenclature -- References -- Study Questions/Problems -- Chapter 2 Energy Storage Systems -- 2.1  
Introduction -- 2.2 Energy Demand -- 2.3 Energy Storage Basics -- 2.4  
Energy Storage Methods -- 2.4.1 Mechanical Energy Storage -- 2.4.2  
Chemical Energy Storage -- 2.4.3 Electrochemical Energy Storage --  
2.4.4 Biological Storage -- 2.4.5 Magnetic Storage.  
2.4.6 Thermal Energy Storage (TES) -- 2.5 Hydrogen for Energy Storage  
-- 2.5.1 Storage Characteristics of Hydrogen -- 2.5.2 Hydrogen  
Storage Technologies -- 2.5.3 Hydrogen Production -- 2.6 Comparison  
of ES Technologies -- 2.7 Energy Storage and Environmental Impact --  
2.7.1 Energy and Environment -- 2.7.2 Major Environmental Problems  
-- 2.8 Environmental Impact and Energy Storage Systems and  
Applications -- 2.9 Potential Solutions to Environmental Problems --  
2.9.1 General Solutions -- 2.9.2 TES-Related Solutions -- 2.10  
Sustainable Development -- 2.10.1 Conceptual Issues -- 2.10.2 The  
Brundtland Commission's Definition -- 2.10.3 Environmental Limits --  
2.10.4 Global, Regional, and Local Sustainability -- 2.10.5  
Environmental, Social, and Economic Components of Sustainability --  
2.10.6 Energy and Sustainable Development -- 2.10.7 Environment and  
Sustainable Development -- 2.10.8 Achieving Sustainable Development  
in Larger Countries -- 2.10.9 Important Factors for Sustainable  
Development -- 2.10.10 Sustainable Development Goals -- 2.11  
Concluding Remarks -- References -- Study Questions/Problems --  
Chapter 3 Thermal Energy Storage Methods -- 3.1 Introduction -- 3.2  
Thermal Energy -- 3.3 Thermal Energy Storage -- 3.3.1 Basic Principle  
of TES -- 3.3.2 Benefits of TES -- 3.3.3 Criteria for TES Evaluation --  
3.3.4 TES Market Considerations -- 3.3.5 TES Heating and Cooling  
Applications -- 3.3.6 TES Operating Characteristics -- 3.3.7 ASHRAE  
TES Standards -- 3.4 Solar Energy and TES -- 3.4.1 TES Challenges for  
Solar Applications -- 3.4.2 TES Types and Solar Energy Systems --  
3.4.3 Storage Durations and Solar Applications -- 3.4.4 Building  
Applications of TES and Solar Energy -- 3.4.5 Design Considerations  
for Solar Energy-Based TES -- 3.5 TES Methods -- 3.6 Sensible TES --  
3.6.1 Thermally-Stratified TES Tanks -- 3.6.2 Concrete TES.  
3.6.3 Rock and Water/Rock TES -- 3.6.4 Aquifer Thermal Energy  
Storage (ATES) -- 3.6.5 Solar Ponds -- 3.6.6 Evacuated Solar Collector  
TES -- 3.7 Latent TES -- 3.7.1 Operational Aspects of Latent TES --  
3.7.2 Phase Change Materials (PCMs) -- 3.8 Cold TES (CTES) -- 3.8.1  
Working Principle -- 3.8.2 Operational Loading of CTES -- 3.8.3 Design  
Considerations -- 3.8.4 CTES Sizing Strategies -- 3.8.5 Load Control  
and Monitoring in CTES -- 3.8.6 CTES Storage Media Selection and  
Characteristics -- 3.8.7 Storage Tank Types for CTES -- 3.8.8 Chilled-  
Water CTES -- 3.8.9 Ice CTES -- 3.8.10 Ice Forming -- 3.8.11 Ice  
Thickness Controls -- 3.8.12 Technical and Design Aspects of CTES --  
3.8.13 Selection Aspects of CTES -- 3.8.14 Cold Air Distribution in  
CTES -- 3.8.15 Potential Benefits of CTES -- 3.8.16 Electric Utilities and  
CTES -- 3.9 Seasonal TES -- 3.9.1 Seasonal TES for Heating Capacity --  
3.9.2 Seasonal TES for Cooling Capacity -- 3.9.3 Illustration -- 3.10  
Concluding Remarks -- References -- Study Questions/Problems --  
Chapter 4 Energy and Exergy Analyses -- 4.1 Introduction -- 4.2  
Theory: Energy and Exergy Analyses -- 4.2.1 Motivation for Energy and  
Exergy Analyses -- 4.2.2 Conceptual Balance Equations for Mass,  
Energy, and Entropy -- 4.2.3 Detailed Balance Equations for Mass,  
Energy, and Entropy -- 4.2.4 Basic Quantities for Exergy Analysis --  
4.2.5 Detailed Exergy Balance -- 4.2.6 The Reference Environment --

4.2.7 Efficiencies -- 4.2.8 Properties for Energy and Exergy Analyses --  
4.2.9 Implications of Results of Exergy Analyses -- 4.2.10 Steps for  
Energy and Exergy Analyses -- 4.3 Thermodynamic Considerations in  
TES Evaluation -- 4.3.1 Determining Important Analysis Quantities --  
4.3.2 Obtaining Appropriate Measures of Efficiency -- 4.3.3 Pinpointing  
Losses -- 4.3.4 Assessing the Effects of Stratification -- 4.3.5  
Accounting for Time Duration of Storage.  
4.3.6 Accounting for Variations in Reference-Environment Temperature  
-- 4.3.7 Closure -- 4.4 Exergy Evaluation of a Closed TES System --  
4.4.1 Description of the Case Considered -- 4.4.2 Analysis of the  
Overall Process -- 4.4.3 Analysis of Subprocesses -- 4.4.4 Alternative  
Formulations of Subprocess Efficiencies -- 4.4.5 Relations Between  
Performance of Subprocesses and Overall Process -- 4.4.6 Example --  
4.4.7 Closure -- 4.5 Appropriate Efficiency Measures for Closed TES  
Systems -- 4.5.1 TES Model Considered -- 4.5.2 Energy and Exergy  
Balances -- 4.5.3 Energy and Exergy Efficiencies -- 4.5.4 Overall  
Efficiencies -- 4.5.5 Charging-Period Efficiencies -- 4.5.6 Storing-  
Period Efficiencies -- 4.5.7 Discharging-Period Efficiencies -- 4.5.8  
Summary of Efficiency Definitions -- 4.5.9 Illustrative Example --  
4.5.10 Closure -- 4.6 Importance of Temperature in Performance  
Evaluations for Sensible TES Systems -- 4.6.1 Energy, Entropy, and  
Exergy Balances for the TES System -- 4.6.2 TES System Model  
Considered -- 4.6.3 Analysis -- 4.6.4 Comparison of Energy and  
Exergy Efficiencies -- 4.6.5 Illustration -- 4.6.6 Closure -- 4.7 Exergy  
Analysis of Aquifer TES Systems -- 4.7.1 ATES Model -- 4.7.2 Energy  
and Exergy Analyses -- 4.7.3 Effect of a Threshold Temperature --  
4.7.4 Case Study -- 4.7.5 Closure -- 4.8 Exergy Analysis of Thermally  
Stratified Storages -- 4.8.1 General Stratified TES Energy and Exergy  
Expressions -- 4.8.2 Temperature-Distribution Models and Relevant  
Expressions -- 4.8.3 Discussion and Comparison of Models -- 4.8.4  
Illustrative Example: The Exergy-Based Advantage of Stratification --  
4.8.5 Illustrative Example: Evaluating Stratified TES Energy and Exergy  
-- 4.8.6 Increasing TES Exergy Storage Capacity Using Stratification --  
4.8.7 Illustrative Example: Increasing TES Exergy with Stratification --  
4.8.8 Closure.  
4.9 Energy and Exergy Analyses of Cold TES Systems -- 4.9.1 Energy  
Balances -- 4.9.2 Exergy Balances -- 4.9.3 Energy and Exergy  
Efficiencies -- 4.9.4 Illustrative Example -- 4.9.5 Case Study:  
Thermodynamic Performance of a Commercial Ice TES System -- 4.9.6  
Case Study: Energy and Exergy Analyses of An Ice-on-Coil Thermal  
Energy Storage System -- 4.9.7 Closure -- 4.10 Exergy-Based Optimal  
Discharge Periods for Closed TES Systems -- 4.10.1 Analysis  
Description and Assumptions -- 4.10.2 Evaluation of Storage-Fluid  
Temperature During Discharge -- 4.10.3 Discharge Efficiencies --  
4.10.4 Exergy-Based Optimum Discharge Period -- 4.10.5 Illustrative  
Example -- 4.10.6 Closure -- 4.11 Exergy Analysis of Solar Ponds --  
4.11.1 Experimental Solar Pond -- 4.11.2 Data Acquisition and Analysis  
-- 4.11.3 Energy and Exergy Assessments -- 4.11.4 Potential  
Improvements -- 4.12 Concluding Remarks -- Nomenclature --  
References -- Study Questions/Problems -- Appendix: Glossary of  
Selected Exergy-Related Terminology -- Chapter 5 Numerical Modeling  
and Simulation -- 5.1 Introduction -- 5.2 Approaches and Methods --  
5.3 Selected Applications -- 5.4 Numerical Modeling, Simulation, and  
Analysis of Sensible TES Systems -- 5.4.1 Modeling -- 5.4.2 Heat  
Transfer and Fluid Flow Analysis -- 5.4.3 Simulation -- 5.4.4  
Thermodynamic Analysis -- 5.5 Case Studies for Sensible TES Systems  
-- 5.5.1 Case Study 1: Natural Convection in a Hot Water Storage Tank  
-- 5.5.2 Case Study 2: Forced Convection in a Stratified Hot Water Tank

-- 5.5.3 General Discussion of Sensible TES Case Studies -- 5.6  
Numerical Modeling, Simulation, and Analysis of Latent TES Systems --  
5.6.1 Modeling -- 5.6.2 Heat Transfer and Fluid Flow Analysis -- 5.6.3  
Simulation -- 5.6.4 Thermodynamic Analysis -- 5.7 Case Studies for  
Latent TES Systems.  
5.7.1 Case Study 1: Two-Dimensional Study of the Melting Process in  
an Infinite Cylindrical Tube.
