

1. Record Nr.	UNINA9910555272603321
Autore	Tong Mei Song
Titolo	The Nystrom method in electromagnetics // Mei Song Tong, Weng Cho Chew
Pubbl/distr/stampa	Hoboken, New Jersey, USA : , : Wiley-IEEE Press, , 2019 [Piscataway, New Jersey] : , : IEEE Xplore, , [2020]
ISBN	1-119-28487-2 1-119-28485-6 1-119-28488-0
Descrizione fisica	1 online resource (525 pages)
Disciplina	537.0151
Soggetti	Electromagnetism - Mathematics Integral equations - Numerical solutions
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Electromagnetics, physics, and mathematics -- Computational electromagnetics -- Nystrom method -- Numerical quadrature rules -- Singularity treatment -- Application to conducting media -- Application to penetrable media -- Incorporation with multilevel fast multipole algorithm -- Application to solve multiphysics problems -- Application to solve time-domain integral equations.
Sommario/riassunto	"Systematically introduces the fundamental principles, equations and advantages of the Nystrom method for solving electromagnetic problems. Features the unique benefits of using the Nystrom method through numerical comparisons with other numerical and analytical methods. Covers a broad range of application examples that will point the way for future research Market description: Primary: Graduate students, senior undergraduates, and researchers studying engineering electromagnetics, computational methods, and applied mathematics Secondary: Practicing engineers/ industry professionals working in engineering electromagnetics and engineering mathematics"--
