

1. Record Nr.	UNINA9910555275303321
Titolo	Sulfur-containing polymers : from synthesis to functional materials / / edited by Xing-Hong Zhang and Patrick Theato
Pubbl/distr/stampa	Weinheim, Germany : , : Wiley-VCH, , [2021] ©2021
ISBN	3-527-82380-8 3-527-82381-6 3-527-82379-4
Descrizione fisica	1 online resource (xxv, 446 pages) : illustrations
Disciplina	547.06
Soggetti	Organosulfur compounds Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Cover -- Title Page -- Copyright -- Contents -- Introduction -- Chapter 1 Synthesis of SulfurContaining Polymers Through Multicomponent Polymerizations -- 1.1 Introduction -- 1.2 Multicomponent Polymerizations of Elemental Sulfur -- 1.2.1 Multicomponent Polymerization of Sulfur, Dialdehydes, and Diamines -- 1.2.2 Multicomponent Polymerization of Sulfur, Diynes, and Aliphatic Amines -- 1.2.3 Multicomponent Polymerization of Sulfur, Benzyl Diamines, and Aliphatic Diamines -- 1.2.4 Multicomponent Polymerization of Sulfur, Diarylacetic Acids, and Aliphatic/Aromatic Diamines -- 1.2.5 Multicomponent Polymerization of Sulfur, Diisocyanides, and Aliphatic Diamines -- 1.3 Cu(I)Catalyzed Multicomponent Polymerizations of Sulfonyl Azides/Hydrazides -- 1.3.1 Multicomponent Polymerization of Sulfonyl Azides, Alkynes, and Amines/Alcohols -- 1.3.2 Multicomponent Polymerization of Sulfonyl Azides, Alkynes, and Other Monomers -- 1.3.3 Multicomponent Polymerization of Sulfonyl Hydrazide, Alkynes, and Diphenyl Dichalcogen -- 1.3.4 Topological Polymers Prepared from Sulfonyl Azides and AlkyneBased MCPs -- 1.4 Multicomponent Polymerizations with ThiolRelated Monomers -- 1.4.1 OnePot Multicomponent

Tandem Polymerization of Alkyne, Carbonyl Chloride, and Thiol --
 1.4.2 Multicomponent Polymerizations with Cyclic Dithiocarbonate --
 1.4.3 Multicomponent Polymerizations with Cyclic Thiolactone -- 1.5
 The Applications of SulfurContaining Polymers Prepared from MCP --
 1.5.1 Chemosensors -- 1.5.2 Metal Ion Removal/Enrichment -- 1.5.3
 Cell Imaging -- 1.6 Conclusion -- Acknowledgments -- References --
 Chapter 2 Carbon Disulfide Derived Polymers -- 2.1 Introduction -- 2.2
 Synthesis of Thiiranes (Episulfides) -- 2.3 Copolymerization Reactions
 -- 2.3.1 Copolymerization of Carbon Disulfide and Episulfides -- 2.3.2
 Copolymerization of Carbon Disulfide and Epoxides.
 2.3.2.1 Scrambling Mechanism for Sulfur/Oxygen Atoms -- 2.3.2.2
 NMR Scrambling Studies -- 2.3.2.3 Mixed Species Scrambling -- 2.4
 Other Related CS₂Based Polymers -- 2.5 Concluding Remarks --
 Acknowledgments -- References -- Chapter 3 Carbonyl Sulfide Derived
 Polymers -- 3.1 Introduction -- 3.1.1 Overview of COS -- 3.1.2
 Preparation of COS -- 3.1.2.1 Direct Reaction of CO and Sulfur --
 3.1.2.2 Using Carbon Disulfide (CS₂) -- 3.1.2.3 Laboratory Preparation
 of COS -- 3.1.3 Environmental and Safety Considerations -- 3.1.4 COS
 Chemistry -- 3.1.4.1 Dissociation -- 3.1.4.2 Hydrolysis -- 3.1.4.3
 Oxidation -- 3.1.4.4 Reduction -- 3.1.4.5 Reaction with SO₂ -- 3.1.4.6
 Reaction with Ammonia and Amines -- 3.1.4.7 Miscellaneous Reactions
 -- 3.1.4.8 The Claus Reaction -- 3.2 Metal Catalysts for COS
 Copolymerization -- 3.2.1 ZincCobalt(III) DoubleMetal Cyanide
 Complex -- 3.2.2 Catalysts Centered with Chromium (Cr) -- 3.2.3
 Catalyst Centered with Iron (Fe) and Cobalt (Co) -- 3.2.4 Alkoxy Metal
 Salts -- 3.3 Organocatalysts for COS Copolymerization -- 3.3.1 TEB
 Organic Base Pair -- 3.3.2 DualSite Lewis Pair -- 3.3.3 Thiourea
 Organic Base Pairs -- 3.3.4 Supramolecular Anion -- 3.4 OxygenSulfur
 Exchange Reaction -- 3.5 Utilization of O/S ER for Poly(thioether)s --
 3.5.1 COSEpoxides Route to Poly(thioether)s -- 3.5.2 CS₂Epoxides
 Route to Poly(thioether)s -- 3.5.3 Repurposing Poly
 (monothiocarbonate)s to Poly(thioether)s -- 3.6 Crystalline COSDerived
 Polymers -- 3.7 COSDerived Block Polymers -- 3.8 Properties of COS
 Derived Polymers -- 3.8.1 Thermal Properties -- 3.8.2 Crystalline
 Properties -- 3.8.3 Optical Properties -- 3.8.4 Electronic Properties --
 3.9 Summary and Outlook -- References -- Chapter 4 ThiolBased Click
 Polymerizations for SulfurContaining Polymers -- 4.1 Introduction --
 4.2 ThiolEne Click Polymerization.
 4.2.1 RadicalInitiated ThiolEne Click Polymerization -- 4.2.2 ThiolEne
 Michael Addition Click Polymerization -- 4.3 ThiolYne Click
 Polymerization -- 4.3.1 RadicalInitiated ThiolYne Click Polymerization
 -- 4.3.2 BaseMediated ThiolYne Click Polymerization -- 4.3.3 Metal
 Catalyzed ThiolYne Click Polymerization -- 4.3.4 Spontaneous Thiol
 Yne Click Polymerization -- 4.4 Other ThiolBased Click
 Polymerizations -- 4.4.1 ThiolEpoxy Click Polymerization -- 4.4.2
 Thiollsocyanate Click Polymerization -- 4.4.3 ThiolHalogen Click
 Polymerization -- 4.5 Conclusion -- Acknowledgments -- References
 -- Chapter 5 Synthesis of Polythioesters -- 5.1 Introduction -- 5.2
 Synthesis of Aromatic Polythioesters -- 5.3 Synthesis of Semiaromatic
 Polythioesters -- 5.4 Synthesis of Aliphatic Polythioesters -- 5.5
 Summary and Concluding Remarks -- Acknowledgments -- References
 -- Chapter 6 Polymers with SulfurNitrogen Bonds -- 6.1 Introduction
 -- 6.2 Synthesis of SulfurNitrogen Containing Polymers -- 6.2.1 Poly
 (sulfenamide)s -- 6.2.2 Poly(diaminosulfide)s -- 6.2.3 Poly
 (aminodisulfide)s and Poly(diaminodisulfide)s -- 6.2.3.1 Poly
 (aminodisulfide)s -- 6.2.3.2 Poly(diaminodisulfide)s -- 6.2.4 Poly
 (oxothiazene)s -- 6.2.5 Poly(sulfonylimidate)s -- 6.2.6 Poly
 (sulfonylamidine)s -- 6.3 Applications of Polymers with SulfurNitrogen

Bond -- 6.3.1 Biomedical Applications -- 6.3.2 Metallon Detection --
 6.3.3 Flame Retardant Chemicals Based on Polymers with Sulfur
 Nitrogen Bonds -- 6.3.4 Energy Storage Applications -- 6.4 Conclusion
 and Outlook -- References -- Chapter 7 Thioester Functional Polymers
 -- 7.1 Introduction -- 7.2 Thioesters: Structural Features, Reactivities,
 and Reactions -- 7.3 Preparation of Thioester Containing Structures --
 7.3.1 Access to Thioester Containing Polymers: Thioesters in the Side
 Chain.
 7.3.2 Access to Thioester Containing Polymers: Thioester in the Chain
 End -- 7.3.3 Access to Thioester Containing Polymers via
 Polymerization Process -- 7.3.4 Access to Thioester Bearing Structures
 via Postmodification Approach -- 7.4 PostPolymerization Modification
 of Thioesters -- 7.5 Conclusion and Outlook -- References -- Chapter
 8 ThiopheneBased Polymers: Synthesis and Applications -- 8.1
 Introduction -- 8.2 Development of Synthetic Methods -- 8.2.1
 Oxidative Polymerization and Electrochemical Polymerization -- 8.2.2
 Transmetalation Polymerization -- 8.2.2.1 Polymerization with Ni
 Catalysis -- 8.2.2.2 Polymerization with Pd Catalysis -- 8.2.2.3 Suzuki
 Coupling Method -- 8.2.2.4 Stille Coupling Method -- 8.2.2.5 Direct
 Arylation Method -- 8.2.3 Other Polymerization Methods -- 8.2.3.1
 Photoinitiated Polymerization -- 8.2.3.2 SolidState Polymerization --
 8.2.3.3 AcidCatalyzed Polymerization -- 8.3 Applications of
 Polythiophene and Its Derivatives -- 8.3.1 Organic ThinFilm
 Transistors -- 8.3.2 Organic Photovoltaics -- 8.3.3 Organic Light
 Emitting Diodes -- 8.3.4 Biological Applications -- 8.4 Conclusions
 and Future Scope -- References -- Chapter 9 High Refractive Index
 SulfurContaining Polymers (HRISPs) -- 9.1 Introduction -- 9.2 Basics of
 Optics -- 9.2.1 Absorption and Refraction -- 9.2.2 Refractive Index --
 9.2.2.1 Refractive Index Determination -- 9.2.3 Dispersion -- 9.2.4
 Birefringence -- 9.3 High Refractive Index Polymers (HRIPs) -- 9.3.1
 General Strategies and Applications -- 9.4 SulfurContaining HRIPs --
 9.4.1 Polyimides and Polyamides -- 9.4.2 Poly(meth)acrylates and
 Polythioacrylates -- 9.4.3 Polycarbonates and Polyesters -- 9.4.4
 Thermosets -- 9.4.5 Inverse Vulcanization -- 9.5 Conclusion and
 Outlook -- References -- Chapter 10 SeleniumContaining Dynamic
 Polymers: From Synthesis to Functions -- 10.1 Introduction.
 10.2 Synthesis of SeleniumContaining Polymers -- 10.2.1 Step Growth
 Polymerization -- 10.2.2 Radical Polymerization -- 10.2.3 Ring
 Opening Polymerization -- 10.2.4 Synthesis of Dendrimer and
 Hyperbranched SeleniumContaining Polymer -- 10.3 Selenium
 Containing Dynamic Covalent Chemistry -- 10.3.1 Diselenide Bond --
 10.3.2 Se S Bond -- 10.3.3 Se Te Bond -- 10.3.4 Se N Bond -- 10.4
 SeleniumContaining Dynamic Materials -- 10.4.1 SeleniumContaining
 Elastomer -- 10.4.2 SeleniumContaining Surface/Interface Materials --
 10.4.3 SeleniumContaining Nanomaterials -- 10.5 Conclusion and
 Outlook -- Acknowledgments -- References -- Chapter 11 Poly
 (disulfide)s -- 11.1 Introduction -- 11.2 Synthesis of Poly(disulfide)s --
 11.2.1 Oxidative Polymerization of Dithiols -- 11.2.2 RingOpening
 Polymerization (ROP) of Cyclic Disulfide -- 11.2.3 PhotoInduced
 Disulfide Metathesis -- 11.2.4 Fragmentation Polymerization -- 11.2.5
 SelfOrganizing SurfaceInitiated Polymerization (SOSIP) -- 11.2.6 Thiol
 Disulfide Exchange Reaction -- 11.3 Amphiphilic PDS and Drug
 Delivery Application -- 11.4 CellPenetrating Poly(disulfide)s -- 11.5
 Summary and Outlook -- References -- Chapter 12 Reduction
 Responsive DisulfideContaining Polymers for Biomedical Applications
 -- 12.1 Introduction -- 12.2 DisulfideContaining Topological Polymers
 -- 12.2.1 Systems with the Disulfide Linkages -- 12.2.2 Disulfide
 Containing Linear Polymers -- 12.2.2.1 Linear Polymers with Cleavable

Backbones -- 12.2.2.2 Linear Polymers with Cleavable Side Chains --
12.2.3 DisulfideContaining Dendritic Polymers -- 12.2.3.1 Disulfide
Containing Hyperbranched Polymers -- 12.2.3.2 DisulfideContaining
Dendrimers -- 12.2.4 DisulfideContaining Polypeptides and Proteins
-- 12.2.5 DisulfideContaining Polymeric Nanoparticles -- 12.2.5.1
Disulfide Linker for Amphiphilic Polymers.
12.2.5.2 Disulfide Linker for NanoAssemblies.
