Nota di contenuto	History and Epidemiology -- A history of its conceptual evolution -- Epidemiology of tubulointerstitial nephritis -- Pathogenesis -- Pathogenesis of Acute Tubulointerstitial Nephritis -- Causes of Acute Tubulointerstitial Nephritis -- Drugs associated with Acute Tubulointerstitial Nephritis -- Viral-induced Tubulointerstitial Nephritis -- Bacterial and parasitic-related tubulointerstitial nephritis -- Tubulointerstitial nephritis due to autoimmune diseases -- IgG4-Related Tubulointerstitial Disease -- Anti-brush border antibody (ABBA)-associated tubulointerstitial disease -- Transplant Rejection and Infection Associated Tubulointerstitial Nephritis -- Non-immune Mediated -- Genetic Diseases Associated with Tubulointerstitial Nephritis -- Cystinosis -- Chronic tubulointerstitial nephritis: Hypokalemia, hyperoxaluria, and hyperuricemia -- Non-immunological Causes of Tubulointerstitial Disease -- Reflux and Obstructive Nephropathy -- Aristolochic Acid Nephropathy and Balkan Nephropathy -- Chronic Kidney Disease of Unknown Etiology -- Infiltrative Disease of the Tubulointerstitium -- Diagnosis -- Clinical features and laboratory findings in acute tubulointerstitial nephritis -- Imaging modalities for acute tubulointerstitial nephritis -- Pathology of

Tubulointerstitial Nephritis -- Treatment -- Management of
Tubulointerstitial Nephritis -- Prognosis/Outcomes -- Prognosis and
outcomes of acute tubulointerstitial nephritis.

Sommario/riassunto

This book provides comprehensive, cutting-edge scientific data on acute and chronic tubulointerstitial nephritis, an area that has not been fully addressed in many nephrology textbooks. This book covers all relevant aspects of the disease, from historical aspects and pathogenesis to diagnosis, pathological findings, treatment, and prognosis and outcomes. The chapters also discuss both immune and non-immune mediated forms of the disease, as well as entities causing tubulointerstitial disease such as medications and toxins, infectious agents, autoimmune diseases, transplant rejection, genetic diseases, infiltrative disease and chronic kidney disease of unknown etiology. The text features up-to-date educational materials that will benefit both basic and clinical scientists. Written by experts in the field, Tubulointerstitial Nephritis is a valuable resource for clinicians, practitioners, researchers and trainees working in the field of nephrology and internal medicine.
