

1. Record Nr.	UNINA9910556887103321
Autore	Bandyopadhyay Debades
Titolo	Supernovae, neutron star physics and nucleosynthesis // Debades Bandyopadhyay and Kamales Kar
Pubbl/distr/stampa	Cham, Switzerland : , : Springer International Publishing, , [2022] ©2022
ISBN	3-030-95171-5
Descrizione fisica	1 online resource (221 pages)
Collana	Astronomy and Astrophysics Library
Disciplina	523.01
Soggetti	Astrophysics Astrophysics - Data processing
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Intro -- Foreword -- Preface -- Contents -- Acronyms -- 1 Introduction -- 2 Theory of Supernova Explosions -- 2.1 Overview: Historical -- 2.2 Supernova Type Ia -- 2.3 Gravitational Collapse and Pre-supernova Conditions -- 2.4 Production of Neutrinos and Their Emission -- 2.5 Shock Wave Formation and Its Eventual Stalling -- 2.6 The Revival of the Shock Wave- the Neutrino Mechanism -- 2.7 Multi-Dimensional Hydrodynamic Simulations and the Present Scenario -- 2.8 The Supernova SN1987A -- 2.9 Detection of Neutrinos from Future Supernova Events -- References -- 3 Neutron Stars -- 3.1 History and Discovery of Neutron Stars -- 3.2 Observational Constraints on Neutron Stars -- 3.2.1 Mass -- 3.2.2 Radius -- 3.2.3 Moment of Inertia -- 3.3 Compositions and Novel Phases of Neutron Stars-Crust to Core -- 3.4 Equation of State Models of Neutron Star Matter -- 3.4.1 Microscopic Models -- 3.4.2 Chiral Effective Field Theory Models -- 3.4.3 Phenomenological Models -- 3.4.4 EoS Models of Matter at Sub-saturation Density -- 3.4.4.1 Baym-Pethick-Sutherland Model of Outer Crust -- 3.4.4.2 EoS Models of Inner Crust -- 3.4.4.3 Extended Nuclear Statistical Equilibrium Model -- 3.5 Relativistic Field Theoretical Models for Dense Matter at Zero and Finite Temperatures -- 3.5.1 Relativistic Mean Field Models -- 3.5.1.1 Hyperon-Hyperon Interaction -- 3.5.2 Bose-Einstein Condensates of (Anti)kaons -- 3.5.3 Quark Matter -- 3.5.3.1 Unpaired Quark Matter -- 3.5.3.2 Color Superconductivity in

Quark Matter -- 3.5.3.3 Nambu-Jona-Lasinio Model for Quark Matter
-- 3.5.4 Density Dependent Hadronic Field Theory at Finite
Temperature -- 3.5.5 Antikaon Condensation at Finite Temperature --
3.5.6 Nuclear Physics Constraints on EoS -- 3.6 Tolman-Oppenheimer-
Volkoff Equation and Structures of Neutron Stars -- 3.7 Stable Branch
of Compact Stars Beyond Neutron Star Branch.
3.8 Rotating Neutron Stars, Moment of Inertia and Quadrupole Moment
-- 3.8.1 Slowly Rotating Neutron Stars -- 3.8.2 Fully Relativistic,
Nonlinear Models of Rapidly Rotating Neutron Stars -- 3.9 Neutron Star
Matter in Strongly Quantizing Magnetic Fields -- 3.9.1 Magnetized
Neutron Star Crusts -- 3.9.2 Dense Matter in Strong Magnetic Fields --
3.10 EoS Tables for Supernova and Binary Neutron Star Merger
Simulations -- Appendix 1 -- References -- 4 Binary Neutron Star
Mergers -- 4.1 Gravitational Waves as New Window into Neutron Stars
-- 4.2 First Binary Neutron Star Merger GW170817 and Multimessenger
Astrophysics -- 4.3 Tidal Deformability, Love Number, and EoS -- 4.4
I-Love-Q Universal Relations -- 4.5 Inspiral Phase of BNS Merger, Tidal
Deformability, and Cold EoS -- 4.6 Neutron Star Radius Determination
from Tidal Deformability -- 4.7 Hot and Neutrino-Trapped Merger
Remnants and Finite Temperature EoSs -- 4.7.1 Fate of BNS Merger
Remnants -- 4.7.2 Upper Bound on Maximum Mass of Neutron Stars
from GW170817 -- 4.7.3 Finite Temperature EoSs and Imprints of
Exotic Matter in GW Signals -- References -- 5 Synthesis of Heavy
Elements in the Universe -- 5.1 Different Modes of Nucleosynthesis:
The s-, the r-, and the p-Processes -- 5.1.1 The s-Process -- 5.1.2
The r-Process -- 5.1.3 The p-Process -- 5.2 Conditions for Production
of Elements by the r-Process and the Sites -- 5.2.1 The Waiting-Point
Nuclei -- 5.2.2 Fission Cycling -- 5.2.3 Freeze-Out -- 5.2.4 Conditions
Needed for the r-Process -- 5.2.5 The Collapse of Massive Stars as Site
for the r-Process -- 5.2.6 Neutron Star-Neutron Star/Black Hole Merger
as Site for the r-Process -- 5.3 Inputs for Nuclear Modelling of the r-
Process -- 5.3.1 Nuclear Masses/Binding Energies -- 5.3.2 Beta Decay
Rates -- 5.3.3 Neutron Capture Rates.
5.4 Electromagnetic Counterpart of GW170817 and Ejected Matter in
BNS Merger -- 5.5 Decompression of Ejected Neutron-Rich Matter in
Lattimer and Schramm Model -- 5.6 Kilonova Model -- 5.7 Heavy
Element Synthesis in Neutron-Rich Matter Ejected in GW170817 --
References -- Index.

2. Record Nr.	UNINA9910783646503321
Autore	Newton Lynn D. <1953, >
Titolo	Coordinating science across the primary school // Lynn D. Newton and Douglas P. Newton
Pubbl/distr/stampa	London ; ; Bristol, Pa. : , : Falmer Press, , 1998
ISBN	1-135-71310-3 1-135-71311-1 1-280-40616-X 0-585-46440-5 9786610406166 0-203-48647-1
Descrizione fisica	1 online resource (227 p.)
Collana	The subject leader's handbooks
Altri autori (Persone)	NewtonDouglas P
Disciplina	372.35044
Soggetti	Science - Study and teaching (Elementary) - Great Britain Interdisciplinary approach in education - Great Britain
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references (p. 205-209) and index.
Nota di contenuto	Book Cover; Title; Contents; List of figures; Series editor's preface; Introduction: Coordinating primary school science; The role of the science coordinator; Your own development as a science coordinator; Working with others; Contributing to school effectiveness; Interpreting the National Curriculum; Interpreting experimental and investigative science; Interpreting life processes and living things, materials and their properties, and physical processes; Science and the whole curriculum; Developing the school policy for science; Policy into practice Monitoring and evaluating the science curriculum Monitoring and evaluating science teaching; Monitoring and evaluating science learning; Managing resources; Information and resources for science coordinators; References; Index
Sommario/riassunto	Specifically designed for busy teachers who have responsibility for coordinating a subject area within their primary school. Each volume in the series conforms to a concise style, while providing a wealth of tips and case studies.
