Nota di contenuto	Implementation of e-procurement and e-business in supply chain management -- IoT project: Smart Parking -- Effects of Theft on the Critical Path of Construction Projects -- Cloud in the Wallet -- Internet of Things & Waste Management -- The Influence of the eBusiness on the airline revenue management -- Information Technology Architects in Agile Organizations.
Sommario/riassunto	This book discusses incentives for information management, usage of information for existing practices to become more efficient, the acceleration of executive learning, and an evaluation of the information management impact on an organization. In today's COVID-influenced volatile world, companies face a variety of challenges. And the most crucial of them are high levels of uncertainty and risk. Therefore, companies are constantly under pressure to provide sustainable solutions. Accordingly, previously gathered knowledge and information can be extremely helpful for this purpose. Hence, this fourth book of our subseries continues to accentuate on different approaches, which point to the importance of continuous progress in structural

management for sustainable growth. It highlights the permanent gain and usage of information. We would be pleased if the book can stimulate further research on this subject matter.
