

1. Record Nr.	UNINA9910556897203321
Autore	Fink Bernd
Titolo	Femoral revision arthroplasty // Bernd Fink
Pubbl/distr/stampa	Cham, Switzerland : , : Springer, , [2022] ©2022
ISBN	9783030848217 9783030848200
Descrizione fisica	1 online resource (303 pages)
Disciplina	617.5810592
Soggetti	Total hip replacement - Reoperation Total hip replacement Femoral artery
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Intro -- Preface -- Contents -- List of Videos -- 1: Introduction -- References -- 2: Reasons for Femoral Revision -- 2.1 Aseptic Loosening -- 2.2 Instability -- 2.3 Periprosthetic Infection -- 2.4 Periprosthetic Fractures -- References -- 3: Classification of Femoral Bone Defects -- 3.1 Paprosky Classification -- 3.1.1 Paprosky Type I Defect -- 3.1.2 Paprosky Type II Defect -- 3.1.3 Paprosky Type IIA Defect -- 3.1.4 Paprosky Type IIB Defect -- 3.1.5 Paprosky Type IIC Defect -- 3.1.6 Paprosky Type III Defect -- 3.1.7 Paprosky Type IV Defect -- 3.2 AAOS Classification by D'Antonio -- 3.3 Endo-Clinic Classification -- References -- 4: Principles of Femoral Revision -- 5: Cemented Revision Stems -- 5.1 Cemented Fixation of Stems Analogous to Primary Implantation -- 5.1.1 Surgical Technique -- 5.1.2 Outcomes -- 5.2 Cement-in-Cement Revision -- 5.2.1 Surgical Technique -- 5.2.2 Outcomes -- 5.3 Impaction Bone Grafting -- 5.3.1 Surgical Technique -- 5.3.2 Outcomes -- References -- 6: Cementless Revision Stems -- 6.1 Nonmodular Cementless Revision Stems for Proximal Fixation -- 6.1.1 Surgical Technique -- 6.1.2 Outcomes -- 6.2 Cementless Proximal-Fixing Modular Revision Stems -- 6.2.1 Surgical Technique -- 6.2.2 Outcomes -- 6.3 Cementless Nonmodular Revision Stems for Distal Fixation -- 6.3.1 Extensively Porous-Coated

Stems -- 6.3.1.1 Surgical Technique -- 6.3.1.2 Outcomes -- 6.3.2  
Corundum-Blasted, Tapered Titanium Stems -- 6.3.2.1 Surgical  
Technique -- 6.3.2.2 Outcomes -- 6.3.3 Cementless Distal Fixation  
Modular Revision Stems -- 6.3.3.1 Surgical Technique -- 6.3.3.2  
Outcomes -- References -- 7: Principles of Cementless Distal Fixation  
-- 7.1 Scratch Fit (Cylinder-in-Cylinder Fixation) -- 7.2 Cone-in-  
Cylinder Fixation -- 7.3 Cone-in-Cone Fixation -- 7.3.1 Length  
of Fixation Zone -- 7.3.2 Distal Interlocking.  
References -- 8: Differences in Distal Fixed Revision Stems --  
References -- 9: Allograft Prosthesis Composite (APC)  
and Megaprotheses -- 9.1 Allograft Prosthesis Composite (APC) --  
9.1.1 Surgical Technique -- 9.1.2 Outcomes -- 9.2 Proximal Femoral  
Replacement (Megaprotheses) -- 9.2.1 Surgical Technique -- 9.2.2  
Outcomes -- 9.3 Total Femoral Replacement -- 9.3.1 Surgical  
Technique -- 9.3.2 Outcomes -- References -- 10: Choice  
of the Implant Depending on the Type of Defect -- 10.1 Paprosky Type  
I Defects -- 10.2 Paprosky Type IIA Defects -- 10.3 Paprosky Type IIB  
Defects -- 10.4 Paprosky Type IIC Defects -- 10.5 Paprosky Type IIIA  
Defects -- 10.6 Paprosky Type IIIB Defects -- 10.7 Paprosky Type IV  
Defects -- References -- 11: Preoperative Planning -- 11.1 Exclusion  
of a Periprosthetic Infection -- 11.2 Prosthesis Planning -- 11.3 Re 1:  
Analysis of the Shape of the Femur -- 11.4 Re 2: Analysis  
of the Mechanical Stability of the Femur -- 11.5 Re 3: Necessity  
for Osteotomies -- 11.6 Re 4: Selection of Prosthesis Shape (Curved or  
Straight) -- 11.7 Re 5: Selection of the Method of Fixation (Proximal or  
Distal) -- 11.8 Re 6: Selection of Component Sizes -- 11.9  
Preparation of the Preoperative Planning Sketch -- 11.9.1 Step 1:  
Mapping the Axes and, Where Necessary, the Osteotomies -- 11.9.2  
Step 2A: Mapping the Distal Components for Distally Fixed Stems --  
11.9.3 Step 2B: Mapping the Distal Components for Proximally Fixed  
Stems -- 11.9.4 Step 3A: Mapping the Proximal Component  
for Distally Fixed Stems -- 11.9.5 Step 3B: Mapping the Proximal  
Component for Proximally Fixed Stems -- 11.9.6 Step 4: Mapping  
Reference Points and Distances -- 11.9.7 Step 5: Further Steps  
in Digital Planning -- References -- 12: Choice of the Surgical  
Approach -- 12.1 Factors Influencing the Choice of Access -- 12.2  
Anterior Approaches.  
12.3 The Transgluteal Approach -- 12.4 Trans-Trochanteric Access  
-- 12.5 The Posterior Approach -- 12.6 Extended Approaches --  
References -- 13: Removal of the Old Stem -- 13.1 Instrumentation --  
13.2 Techniques of Stem Removal -- 13.3 Advanced Special  
Techniques -- 13.3.1 Longitudinal Femoral Osteotomy -- 13.3.2  
Extended Trochanteric Osteotomy (ETO) and/or Transfemoral Access --  
13.3.3 Ventral Bone Window -- 13.4 Removal of Broken Stems --  
References -- 14: Removal of the Cement -- 14.1 Endofemoral,  
Proximal Techniques -- 14.2 Extended Techniques for Removal  
of Cement -- References -- 15: Technical Implementation  
of the Transfemoral Approach -- 15.1 Indications for Transfemoral  
Access -- 15.1.1 Broken Prosthetic Stem -- 15.1.2 Thin Bone Prone  
to Fracture -- 15.1.3 Long Cement Mantle -- 15.1.4 Firmly Fixed or  
Only Partially Loosened Cementless Stem -- 15.1.5 Axial Deviation  
of the Femur -- 15.1.6 Periprosthetic Fracture of the Femur  
(Vancouver B2 or B3 Type) -- 15.1.7 Periprosthetic Infection  
with Firmly Seated Implant or Cement or Hard-to-Reach Osteolyses --  
15.1.8 Cup Protruding into the Lesser Pelvis -- 15.2 Transfemoral  
Access Technique -- 15.3 Variations -- 15.3.1 Double Osteotomy --  
15.3.2 Osteotomy Through the Femur After Prior Removal  
of the Implanted Stem -- 15.3.3 Extended Trochanteric Osteotomy --

15.4 Complications -- 15.5 Outcomes -- References -- 16: Technical Implementation of the Stem Implantation of Modular Revision Stems with Distal Fixation -- 16.1 Scratch-Fit Distal Fixation of a Modular Revision Stem -- 16.2 Cone-in-Cylinder Distal Fixation of a Modular Revision Stem -- 16.3 Cone-in-Cone Distal fixation of a Modular Revision Stem -- 16.3.1 Basic Sequence of Surgical Steps for a Modular Straight Stem (Arcos) -- 16.3.2 Surgical Procedures with a Tapered Modular Revision Stem (Revitan Curved).  
16.3.2.1 Transfemoral Implantation -- 16.3.2.2 Endofemoral Implantation -- 16.3.2.3 Distal Locking -- 16.4 Comments on Surgical Descriptions or Assembly of Modular Stems -- References -- 17: Necessary Length of the Revision Stems -- References -- 18: Stem Revision in Periprosthetic Fractures -- 18.1 Principles of Stem Revision in Periprosthetic Fractures -- 18.2 Treatment of Vancouver Type B2 Fractures (UCS Type IV.3-B2) -- 18.3 Treatment of Vancouver Type B3 Fractures (USC Type IV.3-B3) -- 18.4 Surgical Techniques of Revision Prostheses in Periprosthetic Fractures -- 18.5 Failed Osteosynthesis of Vancouver B1 Fractures (UCS Type IV.3-B1) -- References -- 19: Femoral Spacers in Septic Two-Stage Revision -- 19.1 Type of the Spacer -- 19.2 Fixation of the Spacer -- 19.3 Local Antibiotics in the Spacer -- 19.4 Duration of the Spacer Period and Systemic Antibiotic Therapy -- 19.5 Aspiration Before Reimplantation -- 19.6 Type of Prosthesis Used for Reimplantation -- References -- 20: Postoperative Rehabilitation -- 20.1 Cemented Revision and Cement-in-Cement Revision -- 20.2 Impaction Grafting -- 20.3 Cementless Revision -- 20.4 Allograft Prosthesis Composite (APC) -- 20.5 Proximal Femoral Replacement -- 20.6 Total Femoral Replacement -- References -- 21: Management of Complications -- 21.1 Complications Associated with the Transfemoral Approach (Extended Trochanteric Osteotomy) -- 21.2 Proximalization of the Bony Flap -- 21.3 Subsidence of a Cementless Revision Stem -- 21.4 Intraoperative Fracture of the Greater Trochanter -- 21.5 Postoperative Fracture of the Greater Trochanter -- 21.6 Intraoperative Perforation of the Femur -- 21.7 Intraoperative Fissures and Periprosthetic Fractures of the Femoral Shaft -- 21.8 Postoperative Periprosthetic Fracture of the Femoral Shaft -- 21.9 Hematoma -- 21.10 Periprosthetic Infection.  
21.11 Dislocations -- 21.12 Prosthesis Stem Fracture and/or Fracture of the Junction between Modular Components -- References -- 22: Explanation of Terms -- References.
