

1. Record Nr.	UNINA9910792965803321
Autore	Finn Jennifer
Titolo	Much ado about Marduk : questioning discourses of royalty in First Millennium Mesopotamian literature // Jennifer Finn
Pubbl/distr/stampa	Boston, [Massachusetts] ; ; Berlin, [Germany] : , : Walter de Gruyter Inc., , 2017 ©2017
ISBN	1-5015-0498-3
Descrizione fisica	1 online resource (252 pages)
Collana	Studies in Ancient Near Eastern Records ; ; Volume 16
Classificazione	BE 6405
Disciplina	935/03
Soggetti	Assyro-Babylonian literature Marduk (Babylonian deity) Iraq History To 634 Kings and rulers Assyria History Sources
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Frontmatter -- Preface -- Contents -- Standard Abbreviations -- Chapter 1. Reading Counterdiscursive Texts in the First Millennium BC -- Chapter 2. The Kassite Revolution -- Chapter 3. The Library of Assurbanipal and the Counterdiscursive Landscape -- Chapter 4. The "Babylonian Problem" and Scribal Dialogues of Counterdiscursiveness -- Chapter 5. Counterdiscursiveness beyond belles lettres in and out of Nineveh -- Chapter 6. Textual Hegemony and the Counterdiscursive Public -- Epilogue. The Legacy of Late Akkadian Countertexts -- Bibliography -- Index
Sommario/riassunto	Scholars often assume that the nature of Mesopotamian kingship was such that questioning royal authority was impossible. This volume challenges that general assumption, by presenting an analysis of the motivations, methods, and motifs behind a scholarly discourse about kingship that arose in the final stages of the last Mesopotamian empires. The focus of the volume is the proliferation of a literature that problematizes authority in the Neo-Assyrian period, when texts first begin to specifically explore various modalities for critique of royalty. This development is symptomatic of a larger discourse about the limits

of power that emerges after the repatriation of Marduk's statue to Babylon during the reign of Nebuchadnezzar I in the 12th century BCE. From this point onwards, public attitudes toward Marduk provide a framework for the definition of proper royal behavior, and become a point of contention between Assyria and Babylonia. It is in this historical and political context that several important Akkadian compositions are placed. The texts are analyzed from a new perspective that sheds light on their original milieux and intended functions.

Autore	Simoes M. Godoy
Titolo	Applied Neural Networks and Fuzzy Logic in Power Electronics, Motor Drives, Renewable Energy Systems and Smart Grids
Pubbl/distr/stampa	Basel, Switzerland, : MDPI - Multidisciplinary Digital Publishing Institute, 2020
Descrizione fisica	1 online resource (202 p.)
Soggetti	History of engineering and technology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	Artificial intelligence techniques, such as expert systems, fuzzy logic, and artificial neural network techniques have become efficient tools in modeling and control applications. For example, there are several benefits in optimizing cost-effectiveness, because fuzzy logic is a methodology for the handling of inexact, imprecise, qualitative, fuzzy, and verbal information systematically and rigorously. A neuro-fuzzy controller generates or tunes the rules or membership functions of a fuzzy controller with an artificial neural network approach. There are new instantaneous power theories that may address several challenges in power quality. So, this book presents different applications of artificial intelligence techniques in advanced high-tech electronics,

such as applications in power electronics, motor drives, renewable energy systems and smart grids.
