Soggetti	Law
Lingua di pubblicazione	Tedesco
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	<p>The subject of the dissertation is church asylum under the 2015 agreement of the Federal Office for Migration and Refugees (BAMF) and the Christian churches. The main legal, as well as actual differences to the granting of church asylum since the end of the 1980s are elaborated. The effects of the BAMF-church agreement and the subsequently implemented dossier procedure on the "legal problems" of church asylum are analyzed. This makes it possible to answer whether a legalization of church asylum - already feared 30 years ago - has occurred. In the result no legalization can be recognized, but a so far unknown degree of formalization. The state-provided hardship procedure for refugees in church asylum restricts the legitimacy of any sanctions or eliminates them altogether and shifts the burden of justification in other ways as well. This leads to new or changed consequences of church asylum under simple law.</p>

2. Record Nr.	UNINA9910778070103321
Autore	Green Dorothy <1929->
Titolo	Managing water [[electronic resource] ] : avoiding crisis in California // Dorothy Green
Pubbl/distr/stampa	Berkeley, : University of California Press, c2007
ISBN	9786612360121 1-282-36012-4 0-520-94122-5
Descrizione fisica	1 online resource (337 p.)
Disciplina	363.6/109794
Soggetti	Water-supply - California - Management Water quality - California
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references (p. 291-293) and index.
Nota di contenuto	Frontmatter -- CONTENTS -- ACKNOWLEDGMENTS -- INTRODUCTION -- 1. Los Angeles Area Water Supplies -- 2. Water Management: Who's in Charge? -- 3. Water Use Efficiency -- 4. Drinking Water Quality -- 5. State Policy and the Los Angeles Area -- GLOSSARY -- NATIVE PLANT RESOURCES -- WEBSITES OF INTEREST -- SUGGESTED READINGS -- INDEX
Sommario/riassunto	Water in California is controlled, stored, delivered, and managed within a complex network of interlocking and cooperating districts and agencies. Unraveling and understanding this system is not easy. This book describes how the current system works (or doesn't work) and discusses the issues that face elected officials, water and resource managers, and the general public. Using the Los Angeles area as a microcosm of the state, environmental activist Dorothy Green gathers detailed information on its water systems and applies the lessons learned from this data statewide. A useful primer on watershed and water policy issues, this book provides reasoned, thoughtful, and insightful arguments about sustainability.
