                      Social research and statistics

   Lingua di pubblicazione   Spagnolo

   Formato   Materiale a stampa

   Livello bibliografico   Monografia

   Sommario/riassunto The objective of this document is to offer all the people who take their
                      first steps in R language, a first approach to the environment through
                      the execution of basic commands. The target audience can be defined
                      mostly by students of courses where issues pertaining to descriptive
                      statistics are addressed, it can also be useful for people with more
                      knowledge as a source of consultation, as well as support for teaching
                      staff who desire to teach their classes using this tool.
