

1. Record Nr.	UNINA9910557334103321
Autore	Khan Farhan
Titolo	Prevalence, Fate and Effects of Plastic in Freshwater Environments
Pubbl/distr/stampa	Basel, Switzerland, : MDPI - Multidisciplinary Digital Publishing Institute, 2021
Descrizione fisica	1 online resource (84 p.)
Soggetti	Research and information: general Murntuluk / Catfish (Central NT, North NT SE52-03)
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	<p>Plastic (and microplastic) pollution has been described as one of the greatest environmental challenges of our time, and a hallmark of the human-driven epoch known as the Anthropocene. It has gained the attention of the general public, governments, and environmental scientists worldwide. To date, the main focus has been on plastics in the marine environment, but interest in the presence and effects of plastics in freshwaters has increased in the recent years. The occurrence of plastics within inland lakes and rivers, as well as their biota, has been demonstrated. Experiments with freshwater organisms have started to explore the direct and indirect effects resulting from plastic exposure. There is a clear need for further research, and a dedicated space for its dissemination. This book is devoted to highlighting current research from around the world on the prevalence, fate, and effects of plastic in freshwater environments.</p>

2. Record Nr.	UNINA9910746956903321
Titolo	European Handbook of Dermatological Treatments // edited by Andreas D. Katsambas, Torello M. Lotti, Clio Dessinioti, Angelo Massimiliano D'Erme
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2023
ISBN	3-031-15130-5
Edizione	[4th ed. 2023.]
Descrizione fisica	1 online resource (1780 pages)
Disciplina	616.5 616.506
Soggetti	Dermatology Allergy Surgery Internal medicine Allergology Internal Medicine
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Preface -- Part I Diseases -- Part II Methods -- Part III Drugs.
Sommario/riassunto	This completely updated 4th edition retains the easy-to-use handbook format of the previous successful book, while fulfilling the need for a review of the content. Taking into consideration recent advances in systemic and topical treatments, state-of-the-art lasers, and the latest evidence-based recommendations, it now includes biologic agents for psoriasis and their use as off-label treatments in other skin disorders, targeted agents for malignant melanoma and basal cell carcinoma, and new treatment modalities for rosacea, acne, atopic dermatitis, and urticaria, to name but a few. The European Handbook of Dermatological Treatments provides concise, up-to-date overviews of treatment guidelines and clinical pearls for a large number of skin diseases. It is divided into three main sections addressing the many different skin diseases, the drugs available for dermatological treatments, and the various methods applied in dermatology, including

fillers, botulinum toxin, lasers, dermoscopy, cryosurgery, and electrosurgery. Written by a recognized expert in the field, each chapter focuses on a particular skin disease, illustrating current treatments while providing a brief synopsis of the etiology and clinical presentation of the disease. Treatment indications and contraindications, modes of action, and dosages are clearly identified and the content is enhanced by a wealth of clinical pictures and tables, making it an engaging tool for professionals, and a valuable learning resource for young practitioners, as well as postgraduate students and residents. .
