

1. Record Nr.	UNINA9910795850603321
Autore	Stone David <1970->
Titolo	Decision-making in medieval agriculture [[electronic resource] /] / David Stone
Pubbl/distr/stampa	Oxford ; ; New York, : Oxford University Press, 2005
ISBN	0191514357 9780191514357
Descrizione fisica	xvii, 303 p. : ill., maps
Disciplina	630/.942/0902
Soggetti	Agriculture - England - History Agriculture - Economic aspects - England - History Agricultural innovations - England - History Middle Ages
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Revised and expanded version of author's Ph. D. thesis.
Nota di bibliografia	Includes bibliographical references (p. [277]-293).

2. Record Nr.	UNINA9910557343403321
Autore	Guedron Stephane
Titolo	Mercury and Methylmercury Contamination of Terrestrial and Aquatic Ecosystems
Pubbl/distr/stampa	Basel, Switzerland, : MDPI - Multidisciplinary Digital Publishing Institute, 2021
Descrizione fisica	1 online resource (152 p.)
Soggetti	Chemistry Research & information: general
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	This Special Issue aims to provide new insights into the issue of the mercury contamination of terrestrial and aquatic ecosystems. This ubiquitous contaminant has been used by humans for many years, resulting in global contamination. When this toxic contaminant is converted to methylmercury, it accumulates in trophic chains, which is a major issue for wildlife and human health. The nine articles contained within this Special Issue on "Mercury and Methylmercury Contamination of Terrestrial and Aquatic Ecosystems" endeavour to identify the historical evolution of Hg and MeHg levels in aquatic environments, and to evaluate the impact of current and historical human activities, such as mining, climate change, and soil erosion, on receptor ecosystems and food chains.
