1. Record Nr. UNINA9910557353303321 Autore Ovchinnikova Tatiana V Titolo Marine Bioactive Peptides II: Structure, Function, and Therapeutic Potential Pubbl/distr/stampa Basel, Switzerland, : MDPI - Multidisciplinary Digital Publishing Institute, 2021 1 electronic resource (228 p.) Descrizione fisica Soggetti Medicine Lingua di pubblicazione Inglese **Formato** Materiale a stampa Livello bibliografico Monografia This second edition of the Special Issue "Marine Bioactive Peptides: Sommario/riassunto Structure, Function, and Therapeutic Potential - II" published papers on up-to-date information regarding isolation, structural elucidation, functional characterization, and therapeutic potential evaluation of peptides isolated from marine organisms. Chemical synthesis and biotechnological production of marine peptides and their mimetics will also be a focus of this Special Issue. In addition, this Special Issue will publish new results arising from a peptidomic approach. 24 Papers were accepted and included in the first issue, which we published as a Special Issue book (https://www.mdpi. com/books/pdfview/book/1742). Following the success of the first Special Issue, as Guest Editor, I invite researchers in the field to contribute to the second edition entitled "Marine Bioactive Peptides:

Structure, Function, and Therapeutic Potential - II] ".
