Sommario/riassunto	Melville's Monumental Imagination explores the connection between the contested 19th century American monument tradition and one of the nation's most revered authors, Herman Melville (1819-1891). The book was written to fill a void in recent Melville scholarship. To date, there has not been a monograph that focuses exclusively on Melville's incorporation of monuments in his fictional world. The book charts the territory of Melville's novels in order to provide a trajectory of the monumental image in one particular literary form. This feature allows the reader to gradually see the monu

<b>Sommario/riassunto</b>	<p>This book is generally focused on food choice and which factors are associated with the decisions that define people's eating behaviour. These factors are highly variable and include influences from the surrounding environment as well as the individual characteristics of each person. The book includes a number of chapters that address these issues from different points of view. Some explore the psychology of food choices or the cultural aspects and tradition, as well as the influence of surrounding contexts. Others focus on the role of lifestyle on eating practices and health motivations, but also the food marketing and the sensory aspects of food, as a way to incentive consumption. Finally, sustainability concerns and environmental impacts can also shape and help change people's food choices. Within the chapters gathered on this book you will find key topics that apply to everyday food choices or that can help target food consumption goals towards better health, more sustainable food chains and happier life styles.</p>
