   Titolo   Computation in Complex Networks

   Pubbl/distr/stampa Basel, Switzerland, : MDPI - Multidisciplinary Digital Publishing
                      Institute, 2021

   Descrizione fisica 1 electronic resource (352 p.)

   Soggetti   Technology: general issues

   Lingua di pubblicazione Inglese

   Formato   Materiale a stampa

   Livello bibliografico Monografia

   Sommario/riassunto Complex networks are one of the most challenging research focuses of
                      disciplines, including physics, mathematics, biology, medicine,
                      engineering, and computer science, among others. The interest in
                      complex networks is increasingly growing, due to their ability to model
                      several daily life systems, such as technology networks, the Internet,
                      and communication, chemical, neural, social, political and financial
                      networks. The Special Issue "Computation in Complex Networks" of
                      Entropy offers a multidisciplinary view on how some complex systems
                      behave, providing a collection of original and high-quality papers
                      within the research fields of: •   Community detection •
                      Complex network modelling •   Complex network analysis •
                      Node classification •   Information spreading and control •
                      Network robustness •   Social networks •   Network medicine
