Soggetti	Supplemental Instruction health care education leadership student Norway school learning mathematics teacher skill higher education Schulpädagogik Erwachsenenbildung education knowledge
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	Supplemental Instruction is a program designed to support students in their learning process. The program consists of advanced students supervising new students, where the purpose is to improve students' performance and reduce the risk of interruption of studies. Supplemental Instruction was established almost 50 years ago and is used today in universities around the world. This book examines

different aspects of SI in organizations and leadership, including surveys of Supplemental Instruction programs in Europe, how SI sessions should be organized, the degree to which SI improves retention rates and exam results, SI and learning leadership and leadership development, benefits of being a member of an SI team and employability, SI implementation in healthcare education and virtual students' attitudes towards SI online. The book is aimed at anyone who is concerned about study quality in higher education. The contributors are researchers and lecturers at various universities from several countries. The book is part of a trilogy on Supplemental Instruction, where the themes for the other books are "Digital Technologies" and "Student Learning Processes". The editors of the trilogy are Abbas Strømmen-Bakhtiar, Roger Helde and Elisabeth Suzen, all three Associate Professors at Nord University, Norway.
