

1. Record Nr.	UNINA9910698273903321
Autore	Osterwald C. R
Titolo	Crystalline silicon short-circuit current degradation study [[electronic resource]] : initial results // C.R. Osterwald, J. Pruett, and T. Moriarty
Pubbl/distr/stampa	Golden, Colo. : , : National Renewable Energy Laboratory, , [2005]
Descrizione fisica	4 pages : digital, PDF file
Collana	Conference paper ; ; NREL/CP-520-37357
Altri autori (Persone)	PruettJ (Jim) MoriartyT
Soggetti	Silicon - Electric properties Short circuits
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Title from title screen (viewed on Apr. 27, 2006). "February 2005."

Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di contenuto	Contents; List of Contributors; Acknowledgments; Introduction; 1 An Integrated History of the Holocaust: Possibilities and Challenges; Part I: The Holocaust as a Narrative Problem; Part II: German Society and Redemptive Antisemitism; Part III: Mass Killing and Genocide; Part IV: Perspectives; Index
Sommario/riassunto	This volume provides an in-depth discussion of Saul Friedlander's landmark two-volume history of the Holocaust, Nazi Germany and the Jews. It brings together a range of internationally acclaimed historians to address the manifold conceptual and historiographical issues raised in Friedlander's monumental work. It includes a major essay by Friedlander himself on the challenges of producing an integrated

history of the Holocaust. The aim of this book is not simply to evaluate Friedlander's work on its own merits, but rather to use his text as a means of exploring the contours and future of Holoca

Titolo	Implementation and Scale Up of Point of Care (POC) Diagnostics in Resource-Limited Settings
Pubbl/distr/stampa	Basel, Switzerland, : MDPI - Multidisciplinary Digital Publishing Institute, 2020
Descrizione fisica	1 online resource (154 p.)
Soggetti	Humanities Social interaction
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	Scale up and implementation of new point-of-care (POC) diagnostics is a global health priority to enable the adoption of new evidence-based POC diagnostics and to replicate and extend the reach of POC diagnostics. Global private and public sector agencies have significantly increased their investment in the development of POC diagnostics to meet the unmet needs of patients in resource-limited settings, particularly disease burdened settings with limited access to laboratory infrastructure. However, previous research has demonstrated that the availability of health technologies in these settings does not always guarantee patient-centered outcomes. The applicability, effectiveness and sustainability of diagnostic technologies is affected by the involvement of all stakeholders during planning and implementation, which must be relevant to each specific context and sensitive to local culture. Factors such as infrastructure, resources, values and characteristics of participants can influence the implementation, scalability and sustainability of health interventions such as POC

diagnostics. This book, "Implementation and Scale up of Point of Care (POC) Diagnostics in Resource-Limited Settings", presents literature reviews and primary research studies focusing on the implementation and scale up of POC diagnostics in resource-limited settings.
