1. Record Nr. UNINA9910557485303321 Autore Sugimoto Koh-ichi Titolo Performance of Mechanical Properties of Ultrahigh-Strength Ferrous Steels Related to Strain-Induced Transformation Pubbl/distr/stampa Basel, Switzerland, : MDPI - Multidisciplinary Digital Publishing Institute, 2020 Descrizione fisica 1 electronic resource (158 p.) History of engineering & technology Soggetti Lingua di pubblicazione Inglese **Formato** Materiale a stampa Livello bibliografico Monografia A variety of topics concerning ultrahigh-strength ferrous steels were Sommario/riassunto collected in this book. At present, most of the ferrous steels are applied to cold sheet parts. However, they may be used as the materials of hotforged parts in the future, because of the excellent performance of the mechanical properties. It is hoped that many researchers will have an interest in the applications of the ferrous steels to the hot-forging parts.
